

# Azure Assessment

## Big Green IT Azure Assessment

Each Azure project begins with a comprehensive Azure assessment, during which our team evaluates the existing environment, tackles challenges like compatibility and security, and designs a personalized migration approach.

### Azure Assessment Objectives:

- Evaluate Client's current Azure environment.
- Utilize features and services within Azure to optimize the total cost of ownership.
- Improve performance and reliability of the Client's IT investment by utilizing Azure.

### Deliverables

Big Green IT will develop, present, and deliver the following as part of this project:

- Completion of milestones as listed.
- Assessment Findings and Recommendations report.
- Optional Execution Document (additional cost)

**\$4,950\***

\*Price dependent on size of network and amount of devices.

### Azure Assessment Milestones

#### Project Planning

Verify Azure subscription services, develop Project Plan, issue handling, and access to necessary environments.

#### Discover and Access

Perform a thorough assessment analyzing all environments, current issues, and database performance, followed by detailed data analysis resulting, including technology/services overview, risks, recommendations, and a potential migration roadmap if relevant.

#### Discuss and Plan

Identify and prioritize top-priority changes, formulate a list of recommendations, and subsequently review these findings with the Client's IT staff.

#### Project Completion

Execute a comprehensive review of deliverables.
