

VAT Spectrum - don't waste time preparing VAT reports

VAT Spectrum is a web-based tool for preparing VAT returns, control statements and EC Sales Lists.

VAT Spectrum is a Software as a Service - you pay only one monthly subscription fee. No costs associated with installation, maintenance or update of the tool.

The solution, which **enables the preparation of all VAT reports, will help you detect errors in reporting and check the validity of your customers' and suppliers' VAT IDs.**

Based on the data entered, VAT Spectrum calculates all your VAT reports for you, then automatically arranges transactions into individual sections of the control statement and the EC Sales List. You can then download all reports

VAT Spectrum is also an analytical tool; on the dashboard it shows the development of your tax liability or excess VAT deduction throughout the year and helps to detect unusual

List. You can then download all reports in the desired format: xml for submission to the respective tax office, and/or pdf and Excel for storage.

In addition to calculating your VAT returns, VAT Spectrum performs a series of 17 checks, such as checking whether transaction dates differ from the reporting period, determining whether the same transaction is reported in multiple tax periods (thus avoiding duplication in reporting), checking if you have already claimed a VAT deduction from a particular transaction in the past and more.

fluctuations. You can add notes to individual tax periods to collaborate with other colleagues participating in preparing the reports.

VAT Spectrum stores all notes and time data related to the process of preparing VAT reports in case of potential inspections by the tax office or personnel changes in your company.

It also monitors the threshold for Intrastat registration.

Basic functions

Language

How does it work?

Basic functions

Preparation of VAT reports in the required xml format, including copies in pdf or Excel, along with a function to create additional VAT returns, subsequent control statements and corrective reports

Checks – 17 checks including online check of validity of VAT IDs of suppliers and customers, including reliability checks of payers and published bank accounts

Annual values – the tool keeps track of whether you have exceeded the threshold for Intrastat registration and prepares the so-called annual return, which accumulates the sums of individual lines of VAT returns per year in order to determine the turnover for 12 calendar months

Dashboard – keep track of how your tax liability develops throughout the year

Notes – communicate with your colleagues and leave audit trails for the team that prepares VAT reports

Checks

Audit trail

Home page

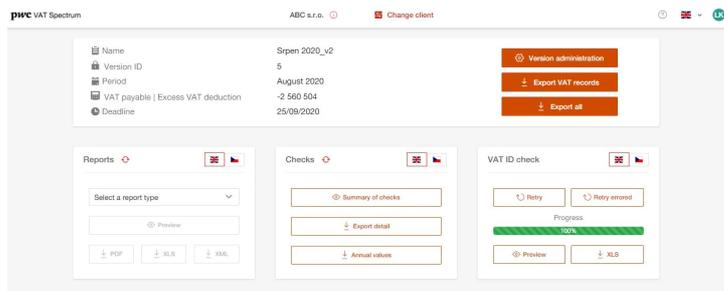

The home page help you out if your company manages multiple VAT registrations in the tool. This is a real

advantage of VAT Spectrum – you can resolve VAT reports for several companies all in one place..

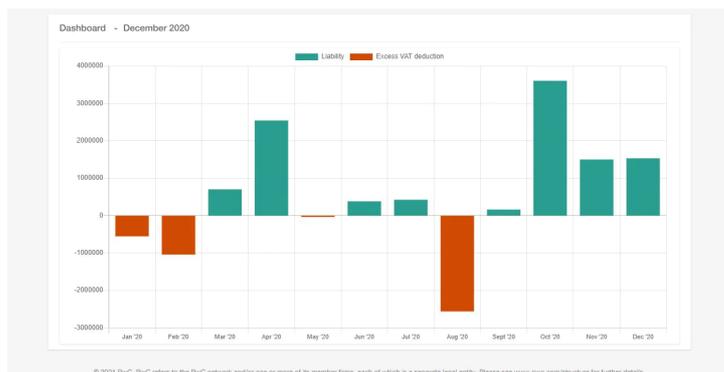

Client home page

This feature is a home page with clearly arranged data for the selected tax period.

Dashboard

The dashboard is an easy-to-read chart that tracks the development of a

tax liability or
excess VAT
deduction.

Checks

Summary of checks

Name	Count	Notes
A5_OVER_10000	0	Show all transactions which are in Section A5 and its total value is over CZK 10,000
B3_OVER_10000	0	Show all transactions which are in Section B3 and its total value is over CZK 10,000
CREDIT_NOTES_LOCAL_SALE	0	Show all transactions reported on sheets 1 and 24 which have negative value
DATE_CHECK	0	Show all transactions from sheets 1, 2, 3, 5, 6, 10 and 24 where date differs from a reporting period
DUPLICATE_PURCHASE_CURRENT	0	Show all duplicates in sheet 14 in the current reporting period
DUPLICATE_PURCHASE_IN_HISTORY	0	Show all duplicates (at least last 3 years) in sheet 14 of final versions of VAT reports
DUPLICATE_SALE_CURRENT	2	Show all duplicates in sheets 1 and 24 in the current reporting period
DUPLICATE_SALE_IN_HISTORY	0	Show all duplicates (at least last 3 years) in sheets 1, 24 in all valid data for final versions
