STAR KNOWLEDGE

Our Business Process

Assessment

We gather your requirements and assess the current environment and how business impact required for successful solution building

Functional Analysis

Our consultants understand your exact business requirements and business domain to help propose the best solution

Design

We believe in sharpening our axes before cutting a tree. Our consultants design a solution that not only matters captures your attention, but will also ensure it is practical

Develop and Test

Once the designs have been quantified and qualified, we build solutions that are robust and scalable

Deploy

Once developed and tested, we help it launch the solution in the required environment and help the client get it up and running

Feedback and Support

We work in a fully agile manner and eagerly listen to our client's feedback to build a solution that gets better with time.

STAR KNOWLEDGE

Star Knowledge File Server to SharePoint

File Server to SharePoint

Comprehensive Assessment

We initiate by performing a comprehensive assessment of your existing File Server setup, gaining insights into your data, apps, and user configurations.

Data Migration

Our skilled professionals ensure the secure and accurate transfer of essential data, including emails, documents, calendars, from File Server to SharePoint.
