

Zensar's Hybrid Cloud Mobility solution using Azure & On-Premises Invisible infrastructure

Zensar is a leading digital solutions and technology services company that specializes in partnering with global organizations across industries on their Digital Transformation journeys. Zensar has a global footprint and worldwide presence in US, Europe, Africa, and APAC with over 35 sales and delivery locations across industries.

WHAT WE OFFER

Zensar's Hybrid Cloud Mobility solution will take use of Azure's hyperscale capabilities, flexibility, simplicity and easy-to-use cloud platform. Our solution will integrate with the following Azure components:

Azure Docker - With Docker deployment on Azure, enterprises are run modern and traditional Linux or Windows apps with enterprise-grade security, support and scale.

vNET and NSG – Always-on virtual network in the selected Azure region with multiple subnets. Inbound and outbound access for the applications, databases on specific ports. Site-to-Site VPN between production and recovery regions.

Azure Traffic Manager – For traffic diversion to the recovery region in case of a disaster event.

Azure Monitor – For telemetry and analytics of recovered VMs.

See what customers are saying:

We are delighted to have Zensar as a trusted Cloud partner and advisor. Zensar has helped to drive business growth by lowering costs and improving user experience using Hybrid Cloud Architecture reducing 60% of infrastructure cost. Zensar's deep experience in transitioning complex environments from in-house, on-prem and legacy infrastructure to a next-gen software defined hybrid cloud with a ITIL aligned AI and ML led service.

– CIO, Government firm

Zensar's Hybrid Cloud Mobility solution is differentiated by:

1. Application Mobility through Cloud strategy framework and distributed architecture on a Cloud Native Platform
2. On-demand scale up and scale down using cluster on premises and Azure
3. Joint Solution Advantage with Nutanix HCI

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
