dbForge SQL Tools

dbForge SQL Tools is a bundle of cutting-edge standalone tools and SSMS add-ins covering nearly every aspect of SQL database development, management, analysis, testing, and deployment

About us

We are currently one of the leading developers of database management software for 40 000 companies in more than 140 countries. Using the latest technology, we create innovative software products that unlock limitless potential for over 500K developers worldwide. We are committed to delivering world-class products and providing the highest quality advice and support.

Since 1997

Founded in 1997, Devart is currently one of the leading developers of database management software, ALM solutions, and data providers for most popular database servers.

Focused On

We create database tools, ALM solutions, data providers, data integration and backup solutions as well as web and cloud services.

200+ Specialists

More than two hundred highly qualified professionals contribute their knowledge and expertise to ensure that our products and services are among the best in the world.

R&D Office

Our R&D center is based in Kharkiv (Ukraine), while our head office is located in Prague (Czech Republic).

dbForge SQL Tools

SQL tools pack contains versatile SQL Server development tools that provide robust functionality for database development, management, and maintenance. The tools focus on increasing coding productivity, accelerating database-related processes with Continuous Integration, reducing time-consuming work, and improving performance when dealing with daily database tasks and challenges.

Used and Trusted by Enterprises Around the World

Thousands of companies all over the globe choose dbForge SQL Tools

 Microsoft	 ARCONIC	 Anthem®	 POLARIS®
 AmerisourceBergen®	 Hewlett Packard Enterprise	 JABIL	 NUCOR

Why dbForge SQL Tools is a good choice

Productivity Growth

SQL Complete

Code faster with SQL
Autocompletion, Code
Formatting, and Refactoring

Query Builder

Create and Manage SQL
Queries Visually

Search

Quick Search for SQL Objects
and Table Data

Documenter

Generate Documentation for
SQL Server quickly and easily

Decryptor

Decrypt SQL Server Database
Objects

Database Deployment

Data Compare

Compare and Sync SQL Server
Data

Schema Compare

Compare and Sync SQL Server
Schemas

Source Control

Link your SQL Database to
Version Control

Data Pump

Accelerate Data Migration
Between Databases

Why dbForge SQL Tools is a good choice

Performance Boost

Index Manager

Analyze and Fix SQL Index Fragmentation

Monitor

Monitor and Analyze SQL Server Performance

Event Profiler

Collect and Analyze SQL Server Trace Data

Easy Testing

Data Generator

Generate Realistic Test Data for Databases

Unit Test

Write SQL Unit Tests Directly in SSMS

DevOps Automation

Reduce Overall Database Release Costs

How dbForge SQL Tools can help your business

Technology industry

150% TEAM PRODUCTIVITY

With Source Control

Commit, revert, and update your database version with the latest changes, resolve conflicts, and view changes history thus maximizing team collaboration, accelerating version release, and maintaining database integrity.

2X FASTER PERFORMANCE

With Monitor

Visually track and analyze database and query performance with various metrics, identify and minimize production issues faster, and optimize SQL slow queries with a little impact on DB performance.

2X FASTER IMPORT AND EXPORT OPERATIONS

With Data Pump

Migrate data between different databases or server instances up to 2x faster, and automate repetitive export and import tasks using the command-line interface.

“Easy, repeatable. We just wanted the easy way to do things. You've provided us with a reliable tool that we depend on daily.”

STEVE PALMER, Consultant at GoodSoftware.com, LLC
