

Procurement **CoPilot**

Powered by Generative AI

One Stop Solution for all your procurement needs – Gen AI Procurement Solution

With the ground breaking innovation of “Generative AI”, industry has significantly influenced the functioning of organizations. Enterprise are known to have complex business functions, are increasingly adopting automated self-learning solutions to make operations efficient and faster

Evaluating right vendors, ensuring total compliance and the most effective order purchase from an array of options rely majorly on manual research, past experience, time-consuming comparisons, and subjective decision-making. This complexity often leads to suboptimal choices, resulting in potential service quality issues, higher costs, and missed opportunities to deliver best in class solution to the organization

Procurement CoPilot

IGT Solutions has developed Gen AI based Procurement CoPilot to revolutionize the way procurement professionals work and deliver immense benefits to the organization

With the procurement copilot, procurement teams can analyze all the existing and new contracts, identify potential risks, check legal compliance and compare the contracts. This also enable organization with natural language generation capabilities to streamline vendor analysis and selection, automates negotiation support, and simplifies contract lifecycle management, while ensuring compliance and building stronger relationships to unlock unparalleled efficiency, value and enhances business agility

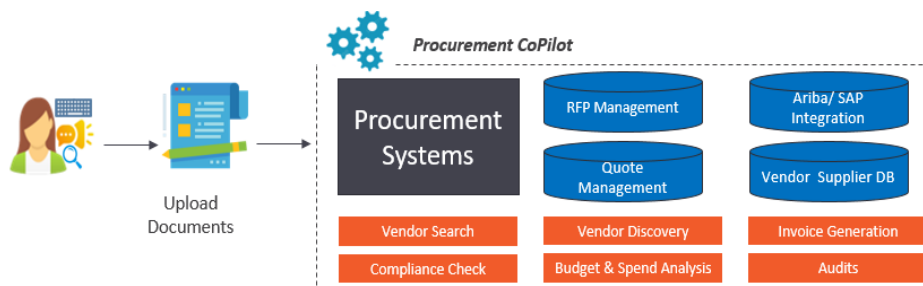

Key Features

-  Shortlisting of suitable vendor from a vast pool based on predefined criteria
