Microsoft

Thrive in the Modern and Secure Workplace

Microsoft 365 is a formidable suite of applications, and now AI-powered CoPilot, a game-changer, supercharges your Microsoft 365 experiences and enhances the way you work and collaborate. However, harnessing the full potential of Microsoft 365 can be a daunting task for many organizations. The complexity of configuring, maintaining, and securing the platform often leaves valuable features untapped.

Cloud Intel facilitates Microsoft 365 Assessment offering a clear roadmap to harness the full potential of Microsoft 365.

Cloud Intel's M 365 Assessment offers an all-encompassing view of your Microsoft 365 landscape. It delves into licensing, security, and usage within your organization, prioritizing risks and opportunities for improvement.

The assessment isn't just about identifying issues; it's about uncovering the untapped potential of Microsoft 365. It provides insights into various scenarios, such as transitioning to the cloud, upgrading to advanced plans like Microsoft 365 E5, and embracing the Modern Desktop approach for digital transformation.

Cloud Intel conducts a comprehensive gap analysis to support your extensive utilization of the newly added Co-Pilot and offers guidance on optimizing the advantages of Microsoft Co-Pilot's features.

Security is paramount, and Cloud Intel's assessment doesn't take it lightly. It evaluates your security posture and provides AI-driven recommendations for making the most of Microsoft 365 security tools, like Microsoft 365 Defender and Sentinel. This ensures the protection of sensitive data and assets while maintaining your organization's reputation.

Beyond the technical aspects, Cloud Intel's assessment includes a comprehensive Business Value Analysis, which covers business value, technical considerations, and financial analysis, providing a 360-degree view of the impact and ROI of your Microsoft 365 investment.
