Welcome to Power Clarity

At Power Clarity, we specialize in simplifying CoE Power BI Dashboard implementation. Our streamlined process empowers your Power Platform experience, saving you time and resources.

With Power Clarity, you can unlock actionable insights within minutes, eliminating the need for complex permissions and configurations.

Mentoring & Consulting

We provide remote mentoring and consulting service to help you with your Power Platform journey.

Community

We are here because of the love from the community, and we give back to promote communities that want to help makers learn, create and grow.

Why Choose Power Clarity

Key Features and Benefits:

1

In-line with CoE

- Same familiar dashboard, enhanced data source.

2

Simplified Implementation

- Say goodbye to lengthy setup processes. With Power Clarity, CoE Power BI Dashboard implementation is a breeze.

3

Low maintenance

- No need to keep updating your solutions – we maintain the backend scanning with Power Clarity.

4

Lower bar of entry

- You don't need Dataverse, Azure Data Lake or Power BI Premium.

5

Download CSV

- Download CSV of your own data.

Streamlined Setup, Immediate Insights

Step 1: Authorization in Power Clarity

Authorize Power Clarity in your Power Platform environment to initiate the streamlined setup process.

Step 2: Receive API Key and Power BI Template

Once authorized Power Clarity will scan your environment. You will be provided with an API Key and a ready-to-use CoE Power BI template to seamlessly connect to your data.

Step 3: Input API Key in Power BI Report

Simply input the provided API Key in the Power BI report, and watch as your data comes to life, providing you with immediate insights.
