

Solve Problems Before They Arise

Klir gives you a **real-time view of important information** like sampling results, customer inspections outcomes, and regulatory compliance status, so you can act sooner.

Never Miss A Thing

With **instant alerts**, your team can stop scrambling to keep up with sampling events, permit deadlines, and inspections.

Get More Done with Effortless Collaboration

Tired of long email threads and status meetings? With Klir, **key information is always accessible** to everyone who needs it, no matter where they are, so your team stays on track.

Stay Connected in the Field

Whether they're taking samples or carrying out an inspection, Klir's mobile-friendly interface makes it easy for field operators to **reference and update records on the go**.

Why Klir?

Built for water professionals, by water professionals. At Klir, we saw first-hand that qualified water experts were spending too much of their valuable time on paperwork. Our mission is to give you that time back, so you can make water better for your community.

Easily get all the insights you need, anytime, anywhere. Whether you're in the office, in the field, or at home, you can always access your utility's important information on our cloud-based platform.

Trusted By the World's Highest Performing Utilities

Klir Up Your Water Management

The All-In-One Software for Water Utility Management

Giving your team time to focus on the bigger picture—making water better.

Prevent Issues Today. Prepare for the Challenges of Tomorrow.

Whether it's adapting to ever-expanding regulatory requirements, extreme weather events, or growing urban populations—water utilities have an increasingly difficult job.

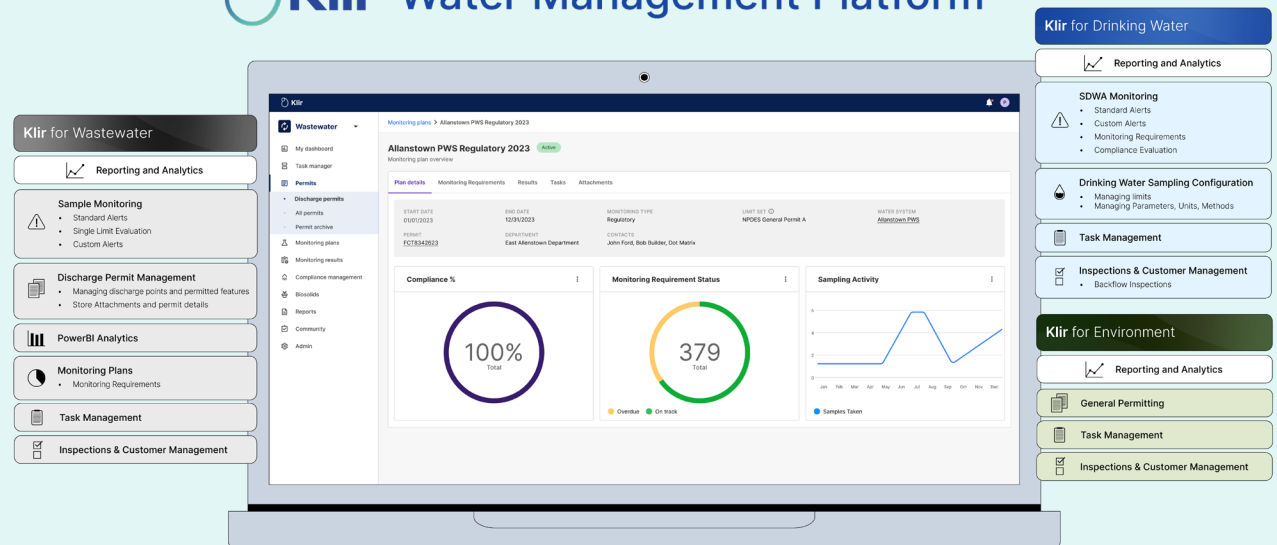

At Klir, we believe it's time that your systems and processes match the sophistication of the work that you do.

Yet in this 24/7 operation, not a single detail can be missed.

Klir gives your utility team on-demand insights into the status of your water system. With built-in automation, simple task management, and rich data analytics of your water quality, you can prevent issues today, while preparing for the ever-evolving demands of tomorrow.

That's why now more than ever, utilities are searching for new approaches to fail-proof and future-proof their processes.

klir Water Management Platform

Your entire water system at your fingertips.

Making water better.

One Platform. All Teams. Just for Water.

Klir is the single cloud-based platform that makes it easy to track and manage critical processes across your entire water & wastewater system—from permits, to sampling, to inspections, and everything in between. Let us handle the time-consuming administrative work, so your team can focus on the bigger picture.
