

Forest Products SAMADHAN- A proven ERP solution for your business

Solution Overview

Customer Profile

Manufacturing and selling Wooden Boxes, Cases and crates, Composite Boxes, and other Wood products.

Business Situation—What are we solving?

A typical unit uses disparate software solutions to manage its operations, financials, resources and infrastructure. It has expansion plans in the pipeline, to meet the demands for a much better product and services coupled with pressure on prices. With SAMADHAN solution you will be able to integrate them together with one solution, that also on a very robust platform D 365 F&O.

The units struggle to cope with ever increasing demand of systematic working. The senior management wears many hats, has a hectic routine of long hours every day and finds profits difficult to come by. This becomes more challenging when you have variety of products manufactured using multiple category of raw materials and design as multi-level BOM. SAMADHAN has made it easy through PDI (Product design interface) integrated with Item, Purchase, Manufacturing, Resources and costing structure.

Integrated information of Operations and Finance on a robust international ERP platform is a crying need. Scalability, usability, technology upgrade path and most importantly prior understanding of the manufacturing business is identified as some of the parameters for identifying a suitable platform and an appropriate implementation partner.

Solution at a glance—How are we solving?

A specialized integrated software solution created for manufacturers of customized Forest products manufacturing, on a world class business suite, Microsoft Dynamics 365 F&O addresses the unique needs of a typical company. It gives full control on the Operations and Finance from the time they get an enquiry till delivery to getting a satisfied and happy customer.

While the software is used for the day to day working, Microsoft Dynamics 365 F&O as a reliable and integrated framework manages the Sales, Purchase, Inventory, Manufacturing, Quality, Asset Management, overall Finance & Accounts and customer relationships control.

The natural integration of the solution with Microsoft Office add ins which includes Microsoft Excel, Microsoft Outlook (the communication interface), SharePoint etc. helps the organization in leveraging the information in the integrated solution in multiple ways.

Compelling features of Forest Products SAMADHAN

- Pre- sales costing process through Product design interface, integrated with Product, manufacturing, Purchase, costing and quality.
- Sales quote without creating the Product in beginning stage itself.
- Sample handling
- Auto creation of Items and FG BOM and Route when Quote is approved
- Role specific Workspaces
- Security role configuration according to user's duty & privileges
- Master planning, Cutting plan and execution, Production planning.
- Scrap (Qty and cost) Estimated VS Actual traceability.
- Flexibility to change the Mother RM item at planning stage.
- Gantt chart view of Production scheduling.
- Approval Workflow configuration.
- Document/ drawing linking facility
- Die and screen threshold management
- Quality control
- Multi country statutory compliance.
- Vendor and Customer complaints
 management
- Gate management
- Dispatch schedule and palletization of finished goods
- Works on mobile, tablet and PCs
- Al and Power Bl enabled

Covers the entire operations with one integrated solution

All activities starting from Quote to Cash, happen through the solution and hence all controls are enforced in real time, complete information is used in real time and after the activities all areas of this solution are impacted in real-time.

Forest Products SAMADHAN solution is specially designed for an industry who are engaged in giving customized wood products solution and Packaging products to their customers. These can be Wooden boxes (with or without pallet), Wooden Euro pallet , Cases and Crates, Honeycomb boxes, Nail less boxes, Corrugated boxes, Composite Boxes made up of various components like: Corrugated Box with Wooden Pallets and Foam made components. There may be many more accessories associated with box like foam, steel strips, handles, steel structures etc.

Pre Sales costing in case where there are multilevel bill of material, complex production processes becomes very difficult to manage. Forest Products SAMADHAN has a very unique feature to give the user ease of creating, maintaining, revising the Pre Sales Costing. Product creation process is built with unique controls for preventing risk of duplicate item creation or improper product creation.

Proactive action pointers and dashboards in role-tailored user interface

As soon as a user login, he is taken to a user interface with matter relating to his specific role in the organization neatly arranged in dashboards and action pointers. As soon as he logs into the system he gets working and in light of real time information. One click on the action pointers or the dashboard takes the user inside and helps him get a 360 degree view of the subject at hand.

Integrated Master planning (Planning optimization) serves MRP and Production scheduling

The Master plan calculates net requirements. It's based on actual current orders and enables companies to control inventory replenishment on a short-term, day-to-day basis. Another term to describe it's the *Net requirements plan*.

The Master planning module determines the supply (materials) and capacity (resources) needs that will meet current demand (the net requirements). It generates the Planned purchase order, Planned production order, Planned transfer order taking into the consideration of time fence define and the net requirement as per Sales orders in hand.

Cutting plan to produce Cut Sizes

FG and Semi-FG Items need the Cut Sizes for production. Cut Sizes are produced from a parent RM, which can be of various sizes. Auto generation of Cutting plan having traceability of Scrap and Cost impact of parent RM adds better control on Cutting operation optimization every day. This benefits as wastage control and production cost control.

Quality control

Quality management module is available to control the Quality related concerns for Inward and Outward transactions as well during the production the In process quality is available. Certificate of analysis (COA) can be generated containing the expected VS Actual test results against each Test Parameter as defined to the Item or Item group level.

Quality control- Test Group and COA

Test Groups are created with applicable test parameter as per the product. Predefined setup of standard values and well as Min/Max range for Quality Pass or fail can be setup against the test parameter. Qualitative and Quantitative both tests can be performed as applicable. COA can be printed after the Quality order is posted after performing quality inspection.

D 365 F&O Mobile App

The mobile app enables your organization to make its business processes available on mobile devices. After your IT admin enables the mobile workspaces for your organization, users can sign in to the app and immediately begin to run business processes from their mobile devices.

D 365 F&O- Power BI

Analytical Workspaces can use rich infographics and visuals that are supported by Microsoft Power BI. These infographics and visuals include many controls as standard. Therefore, workspaces can provide a highly visual, interactive experience for users to analyze Operations and Finance related records.

Warehouse Management

The Warehouse management module lets you manage warehouse processes in manufacturing, distribution, and retail companies. This module has a wide range of features to support the warehouse facility at an optimal level, at any time. Warehouse management is fully integrated with other business processes such as transportation, manufacturing, quality control, purchase, transfer, sales, and returns.

Asset Management

Asset Management is an advanced module for managing assets and maintenance jobs in Dynamics 365 Supply Chain Management. Asset Management integrates seamlessly with several other finance and operations apps.

Asset Management enables you to efficiently manage and service many types of equipment in your company (such as machines, production equipment, and vehicles). Asset Management supports solutions across numerous industries.

Finance & Accounts

Finance and accounts is integrated with operational transactions. It covers all financial transactions which includes– Accounts Receivable, accounts Payable, Cash and Bank transactions, Budgeting, Fixed assets, Taxation, General ledgers etc. . It is capable of handling Muti country localization and Multi currency handling within one environment.

Our customers are counting the benefits, so can you.

Case Study– SAMADHAN Customer

"Having an integrated information system for my business is a dire need, has been my dream and the dream is now realized beyond my expectation; Thanks to SAMADHAN. It has been a delightful experience to work on this project with SAMADHAN, for me and my team." Nazir Dakri, Managing Director, Dakri Cartons Limited.

Debtors turnaround impacted favorably

"It is not that we did not know who owed us how much and when, we did and were working on it aggressively. But after the ERP came in we found a number of pleasant surprises in this area. Our disputed invoices reduced because we were complying with all requirements of the customer as a design now. The mistakes in invoices VS payment reconciliation were completely eliminated and we were able to link all related aspects of the transactions with ease and enter into any discussion with our customer very confidently. Net to net our number of days of outstanding came down."

Guarantee delivery reliability

"The system helps us address all related aspects in unified manner and hence our delivery schedule compliance has improved significantly."

Dramatic reduction in the need for direct supervision

"The solution helps us delegate effectively. Hence the entrepreneurial resources is used at appropriate place rather than getting used in running after the mundane aspects of business."

Ability to respond to sudden demands of customers has improved

"This has helped us gain few more coveted customers and also retain our existing customers. They love it when we are able to help them out in crisis."

With ERP in place they can add more units

One of our customers now feels confident to add more Business units in the same or different geography.

Remote connectivity improves work turnaround

The software can be accessed from anywhere using internet. This means that all the sites can use internet to update work progress daily and the travelling executives and sales persons can have a ready access to the data needed by them to conduct the business effectively.

The enormous experience of SAMADHAN is a great help

SAMADHAN is one of the most experienced Microsoft Dynamics 365 partners in India. With over 90+ ERP implementations, we not only know Dynamics 365 in and out, we are also aware of the nuances of a number of industries. The consulting as well the product knowledge is immense and will be very useful.

Microsoft Dynamics

Microsoft Dynamics is a line of integrated, adaptable business management solutions that enables you and your people to make business decisions with greater confidence. Microsoft Dynamics works like familiar Microsoft software such as Microsoft Office, which means less of a learning curve for your people, so they can get up and running quickly and focus on what's most important. And because it is from Microsoft, it easily works with the systems that your company already has implemented. By automating and streamlining financial, customer relationship, and supply chain processes, Microsoft Dynamics brings together people, processes, and technologies, increasing the productivity and effectiveness of your business, and helping you drive business success.

System requirement for Forest Products SAMADHAN ERP on MSD 365 F&O

The solution works on a online mode and can connect multiple locations with one single solution using the secure internet connections.

The user interface can be through a rich client, any browser. Mobile device or tablet with any operating system can connect with the solution using universal app available for iOS, Windows or Android systems.

The solution is cloud ready

You have an option to use the cloud to the extent you like. The cloud option can address manageability of the server and solution to a great extent. It can also lower the entry level investment required and the expenses can be charged to the revenue account.
