Azure Innovate
AI Jumpstart

KiZAN has created a jumpstart that will help you understand how Microsoft's Generative AI capabilities can transform your business and accelerate innovation by changing the ways we work. You will learn how AI creates value for your business by tapping into your organization's existing sources of knowledge and information to create new insights, ideas, content, and bringing more productive experiences to your workforce.

Explore the Power of Generative AI

Discover how Generative AI technologies including Copilot and Azure AI are changing the nature of work by helping solve complex problems, enhancing creativity, and accelerating innovation for your business.

We will introduce the resources and tools to ensure responsible usage of AI, help you identify risks, security impacts, and discuss mitigation strategies to ensure a safe and secure approach to adopting AI in your organization.

Generative AI Executive Briefing

The Executive Briefing for leadership and business decision makers provides an overview of the value and risks of these transformational changes and sets the stage for deep dive workshops focused on the **Art of the Possible**, and your specific business scenarios using **Microsoft Generative AI**.

Jumpstart framework

Executive Briefing

- How Generative AI transforms work
- Responsible AI and security impacts
- Identify your business value targets
