

An Automated Path to Azure

Powered by Next Pathway

“We are excited to partner with Next Pathway and provide our customers with a faster and more efficient migration path to Microsoft Azure.”

Zia Mansoor

Worldwide Business Vice President Data and AI at Microsoft Canada

DISCOVERY AND PLANNING

Scan Legacy Systems

- Identify data lineage and data dependencies

Generate Wave Plans

- Create custom wave plans
- Autogenerate test scripts

TRANSLATION OF LEGACY CODE & ETL PIPELINES

Automate Code Translation

- Automatically translate complex legacy databases to Azure

Automate ETL Translation

- Automatically translate ETL Pipelines into Azure Data Factory

TESTING SUPPORT AND OPTIMIZATION

Execute Test Cases

- Automatically run test cases based on intelligent data profiling

100% QA Ready Code

- Perform data validation

Next Pathway offers a full suite of migration products to get to **consumption, FAST**

We have years of experience migrating hundreds of clients in the areas of **Financial Services, Healthcare, Manufacturing, Advertising/Media & Entertainment, Retail, Public Sector** and **Technology**.

Next Pathway can assist at any of these critical stages of the migration journey to Azure.

PRE SALES

SHIFT™ Analyzer automatically assesses legacy application workloads to know exactly what code types and objects are present in order to plan a migration to Azure.

Give us a sample of client code and we'll provide a live demonstration of how code is translated in our **SHIFT** UI.

PLANNING

Use **CRAWLER360™** to scan and visualize every object contained in legacy systems, create wave plans, generate test scripts and trigger code translation.

TRANSLATION

SHIFT™Translator automates the translation of complex workloads when executing your migration to the cloud – including **SQL, Stored Procedures, ETL,** and various other code types – for various source and target platforms.

TESTING

TESTER™ automates data validation and hash-level comparison between the legacy application and cloud environment, to accelerate testing cycles to get to cut-over fast.
