INSTANDA™

Insurance. Technology. Decoded.

INSTANDA is a digital engagement, distribution and underwriting platform for the future of insurance.

INSTANDA's no code product design platform is built on a powerful set of insurance -specific calculations, processing and workflow capabilities.

An award winning combination of

Design • Deploy • Iterate   **Rate•Quote•Issue•STP**

Whether digitising an entirely new business, building a new digital ecosystem around your existing business or simply migrating over multiple books and creating new product combinations and propositions, INSTANDA provides everything needed, from customer engagement, through to underwriter workbenches and full customer and policy servicing. With an open-source, modern API framework new capabilities can be created in weeks, all interconnected with the INSTANDA platform.

A platform that's trusted by trailblazing insurers, brokers and MGAs worldwide.

Greater ROI, less risk

INSTANDA integrates seamlessly with your existing systems to give you a powerful product launch platform.

Our Global community of clients help determine INSTANDA's roadmap, making it a truly responsive, low risk insurance product enabler.

- Reduce customer acquisition and operating costs

- One platform, thousands of possibilities

- A true quote and buy digital platform

- Inherently insurance. No more product innovation pain points

INVENT with INSTANDA

Operate in a cloud-based world where there are no limits to insurance. Where products can be securely designed and launched in days and changes made in minutes.

About INSTANDA

Since 2012, INSTANDA clients have brought over 600 products to market, in 13 countries with an average time-to-market of under 12 weeks.

Property & Casualty | Life & Health | Personal Lines
Commercial lines | Composite

INSTANDA's cloud-based, insurance ecosystem for the insurance industry includes a configurable, integrated environment for product design, rating, policy management, digital payments, analytics and services which can be rapidly implemented or upgraded using agile methodologies to deliver the capabilities and results insurers need to compete in a digital-first world.

We can build your products, teach your teams to build them or we can simply switch you on and leave you to create new products.
