

DISEASE SPREAD REPORT IN POWER BI

A way to improve an information proces in healthcare

During pandemic times it is very difficult to get accurate information since there are many sources and many opinions spread on the media and web. The best way to avoid communication chaos is to consolidate all the best and reliable sources into one handy report.

What is product?

Disease Spread Report addresses problems with pandemic reporting and date for every company and organization that might be somehow affected by pandemic. With it's built-in mechanisms and by Power BI, the tool is able to channel the information about disease, information storage, and displays the info in very attractive and intuitive dashboard.

Information Quality	Time & Cost Saving	Process Automation
<ul style="list-style-type: none">• Data stored in one place• Helps collect proper information• Immediately information distribution	<ul style="list-style-type: none">• Easy to implement• Minimal manual work required• Can be used in every department/industry	<ul style="list-style-type: none">• No manual work required• Easy to use – no training• Easy Data insertion
Number of documents decreased to almost 0	Average time reduction to obtain information even by 90%	Average time needed for content verification reduced up to 85%

Disease Spread Report helps company to create a high quality content
