

AZURE DONE RIGHT. THE FIRST TIME.

Adopt Azure with the right foundations and framework to ensure success

WELL-CONSTRUCTED SCAFFOLDING PROVIDES YOU WITH A SAFE, STABLE AND SCALABLE AZURE PLATFORM TO BUILD YOUR CLOUD APPLICATIONS.

AZURE DONE RIGHT WITH ARINCO

The scaffold for Azure sets the guardrails and direction of your cloud deployments. We believe the right skills and capabilities are essential in establishing an Azure foundation so that you're able to work within your pre-defined safe limits. The risk and cost associated with *not* establishing the Azure Foundation right from day one can be significant. Arinco's deployment patterns will establish your Azure foundation based on Microsoft's defined Cloud Adoption Framework. We will empower your team with Azure DevOps automated tooling through pipelines from your chosen code repository.

WHY CUSTOMERS USE THE AZURE DONE RIGHT ACCELERATOR

This 5-week engagement is relevant if you:

- Want to leverage a repeatable, established framework for adopting Azure Cloud
- Are running an Azure environment without strong identity security controls, well-defined RBAC or defined roles across DevOps, NetOps, SecOps and SysOps
- Wish to accelerate your adoption of Azure DevOps
- Need assistance across the Microsoft Azure Cloud Adoption Framework, Azure DevOps, Log Analytics, Azure Sentinel, Azure Virtual Networks, or more

SET YOUR FOUNDATIONS

Understand foundational elements across Azure: Identity, RBAC, Security, Governance and Policies

Bring in DevOps on Azure with CI\CD Pipelines, Infrastructure as Code, Monitoring and Telemetry

The Azure foundation will provide you with the right Azure platform for your cloud deployments

BUILD YOUR PIPING

Deploy a new, custom project pipeline to automatically deploy the core elements

Build connectivity with your on-premises enterprise network

Integrate your identity with your on-premises AD

Piping your foundations to your on-premises environment will ensure you can operate in a true hybrid cloud model

DEPLOY AND MONITOR

Secure and monitor your environment with Azure Governance, Azure AD, Azure Cost Management, Log Analytics, and Azure Sentinel

Start deploying your solution components built on top of our foundational platform

Govern, manage, operate your Azure platform the right way, so you can accelerate your solution deployments built on a strong framework

Arinco achieves the best outcomes by amplifying, partnering and working with your existing teams
