

## AZURE ARC ACCELERATOR

### Support a hybrid cloud environment and reduce the risk of security threats or compliance breaches

If you were one of the many businesses affected by the Windows Server 2012 and 2012 R2 end of life in October 2023, you may now be vulnerable to exploitation and risk of compliance breach.

Due to complex legacy applications, many customers struggled to resolve this problem in time, and leveraging extended support by migrating to the cloud is a major project requiring a lot of planning and time. But we can help.

### OUR SOLUTION

For companies unable to modernise or migrate in time, we've created an Azure Arc Accelerator offering that leverages the power of Azure Arc and a Nasstar Landing Zone specifically tailored to provide Extended Support to Windows 2012 servers as well as SQL 2012.

The Arc Landing Zone is deployed with only the components needed, minimising cost, and allowing for rapid deployment.

### DRIVE BUSINESS VALUE

To maximise value, Nasstar will work in partnership with Microsoft to provide a funded assessment of the IT estate to provide valuable and actionable business intelligence around what a migration to the cloud would look like.

### WHAT IS AZURE ARC ACCELERATOR?

Azure Arc is a bridge that extends the Azure platform to help you build applications and services with the flexibility to run across data centres, at the edge, and in multi-cloud environments. It enables teams to develop cloud-native applications with a consistent development, operations, and security model.

The landing zone accelerator provides best practices, guidance, and automated reference implementations to get started with deployments quickly and easily. Azure Arc-enabled servers landing zone accelerator makes it easy to increase security, governance, and compliance posture on servers that are deployed outside of Azure.

## BENEFITS

**Extended Security coverage for Windows Server 2012 R2 and SQL 2012 for up to 3 years**

**Economical and rapid deployment**

**Modular and scalable foundation in Microsoft Azure**

**Flexible monthly commitment and billing**

**Start exploring the power of the cloud**

**Actionable business intelligence around existing estate and cloud migration**

## WHY NASSTAR?

Nasstar is a leading Microsoft partner, with over 25 years supporting thousands of customers through the power of Azure cloud.

[Find out more here](#)

**55 Microsoft professionals with 174 certifications**

**7 Advanced specialisations**
