

Unleash the true power of SAP with Microsoft Power Platform

In today's rapidly changing business landscape, innovation is the key to thriving. At TCS, we recognize the importance of leveraging technology to drive positive change. We are excited to introduce our intensive 6-week workshop, designed to showcase the significant impact of Microsoft Power Platform in enhancing your SAP processes.

Applications helping data views, transformation, addition, deletion & more

Dashboarding with SAP real-time data, calculated values, embed possibilities & more

Automate workflows for data triggers, notifications, workflows, synchronization & more

Partner & vendor portal build with qualified data access to SAP systems

Robotic process automation with SAP screen scrapping, data validation, rule engine & more

Chatbot integration with SPA systems for point-based data asks, query resolution, FAQs & more

Why SAP and Power Platform?

SAP, a cornerstone of enterprise software, plays a pivotal role in several organizations worldwide. However, in an era where agility, efficiency, and automation are paramount, traditional processes may fall short. This is where Microsoft Power Platform steps in as a catalyst for transformation.

Here's how the integration of SAP and Power Platform can reinvigorate your organization:

Efficiency Gains

Witness firsthand how Power Platform streamlines operations, reduces manual tasks, and automates processes within the chosen SAP process, leading to substantial efficiency gains.

Rapid ROI

Through real-world examples, we will showcase how the integration of Power Platform can result in cost savings & productivity improvements, yielding a rapid return on investment.

Accessible & Collaborative

Get an understanding on how you can extend your SAP platform beyond BAU borders and make it available to people who are crucial in the operational chain of processes. In tandem with it, creating a collaborative zone such as MS Teams based notifications, queries etc. brings in real time responses and quicker process closures

Agile Adaption

Get an estimate of how rapid your development & iteration models are compared to traditional application build, while you can achieve building 'rich, adaptive & customized' apps that best suit your business requirements.

Analytics, Insights & Actions

Enhance your decision analysis & decision making with real-time & interactive dashboards by connecting your SAP systems with Power BI

Spreading Beyond

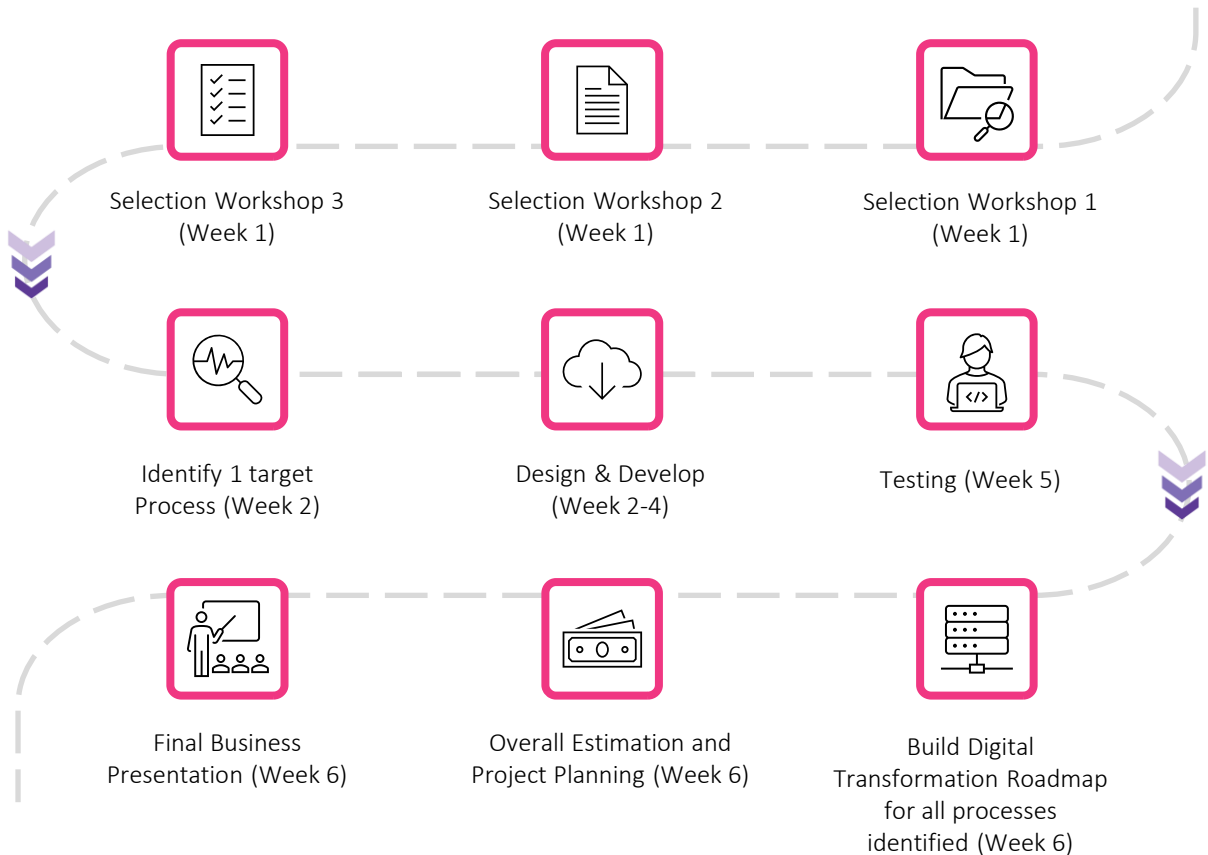

Power and open your own SAP functionalities to spread beyond its defined borders to leverage the collaborative powers of O365, RPA possibilities with Power Automate Desktop, Chatbot derivatives with Power Virtual agents and the unmatched span of Azure services.

Scalability, flexibility, reduced dependence on core teams for data addition or updation, mobile facilitation are a few other benefits the extended SAP + Power Platform landscape provides.

Our Consulting Engagement

Elevate SAP with Power Platform: A 6 Week Discovery Workshop with POC & Roadmap.

At TCS, our mission is to deliver tangible results within the 6-8 weeks workshop duration. Our offering includes:

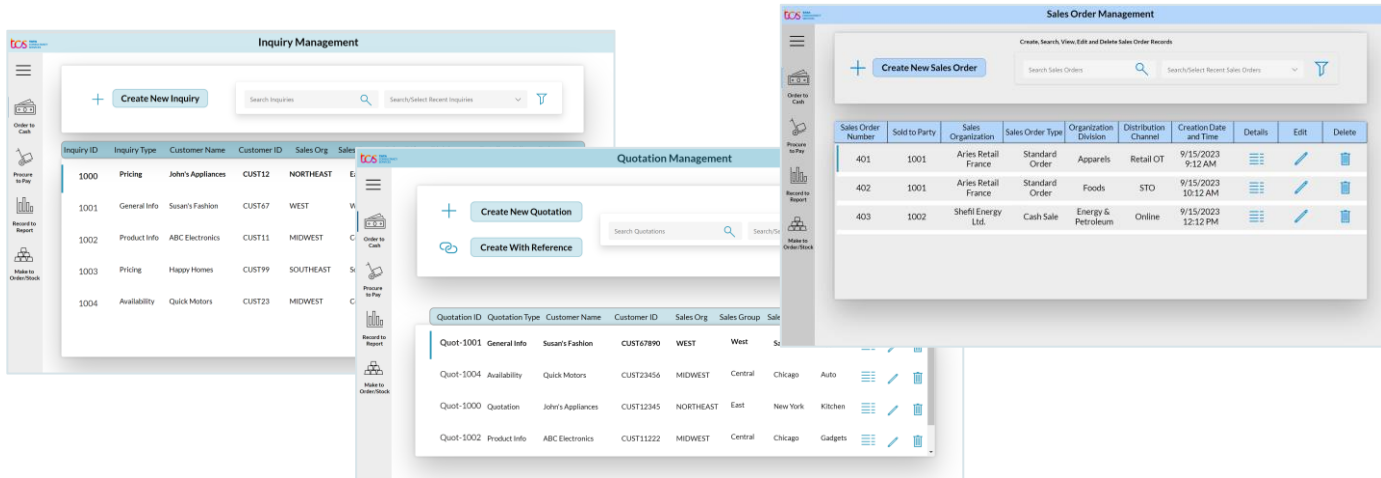

SAP O2C Power Platform Templates

We at TCS are creating starter templates for all SAP modules as part of our journey into multiple usage scenarios. Reach out to us to know more on the templates for other modules such as P2P, FICO etc.

- 1 Inquiry creation/ updates**
Create customer inquiries in an intuitive power app screen. Clear navigation, spaced out data sets, search enabled & enhanced data input features provides users-on-the-go the perfect application for logging their customer inquiry information.
- 2 Quotation creation/ updates**
Quotations can be easily created referencing an inquiry with auto population of basic information cells and additive cells for more in-depth data capture. The workflows for pricing and any other parameters have been provided for traceability, bottleneck identification & rapid process closure encouragement.
- 3 Sales Order creation/ updates**
Quotation referenced creation of sales order with parallel & multi-level approval workflow indication provides users a single window view of the entire process.
- 4 Sales Order Creation Automation**
An automatic sales order creation process with text and data extraction from emails, quotes or purchase orders created from customer organization.
