Microsoft Power Platform is already available to enterprise customers!

Solution Overview

Power Platform Health Check Assessment

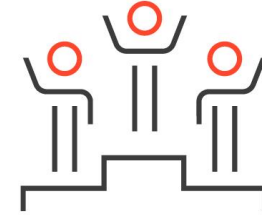

Secure your tenant by implementing governance, reduce risk and ensure compliance by implementing data loss prevention policies.

Help optimize your license usage by understanding current consumption and utilize the licenses available.

Empower your organization to start automating business processes and creating mobile apps in a safe and secure environment.

Realize business value from adopting Microsoft Power Platform through automating business processes and modernizing legacy applications.

Gain an insight into the health of your Microsoft Power Platform tenant through analyzing your environment against recommended best practice guidance. Kyndryl will help in identifying and diagnosing your issues and risks. Work with certified experts to review your results and develop a plan that limits risk but ensures successful adoption of this no-code/low-code platform.

Key Takeaways

Power Platform Health Check Assessment

- Expert analysis and prioritized remediation guidance on what to resolve/configure/implement
- Report detailing analysis, review and expert recommendations accompanied with a unique customer journey map detailing current status, milestones/objectives and proposed future state
- Set your organization up for success! Providing you an oversight of current usage will enable you to identify champions and key areas of the business already consuming this platform

Demonstrating Best in Class

Microsoft Solutions Partner
