

COBWEBS
TECHNOLOGIES

Web Intelligence for a Safer World

Cobwebs Technologies is a global leader in AI-Powered Open-Source Intelligence (OSINT). Our mission is to protect global communities and organizations from crime, threats, and cyber-attacks, by providing seamless access to publicly available data.

Accelerate Investigations and Detect Threats

Cobwebs' solutions assist analysts and investigators with unprecedented and simultaneous access to the web's big data. Our powerful web intelligence platform enables search and analysis of endless digital channels from open, deep, and dark web.

Our solutions are making OSINT accessible and impactful, with an enhanced yet user friendly platform, designated to accelerate investigations and generate real-time intelligence.

It utilizes AI-Powered technologies to discover new leads, analyze risks, and detect threats. Users gain deep insights and substantial intelligence including context, relations, locations, networks, and more.

Powering Web Intelligence

Search

Search actionable data
From the world's vast
digital channels

Analyze

Analyze web sources to
generate intelligence
and discover insights

Alert

Alert on critical information
and maintain situational
awareness

Benefits

Web Discovery

Enable seamless access to all web layers and public records. Identify threat actors, extracts topics, and discover illicit activities

Streamlined AI

AI-Powered analytics using machine learning algorithms to detect threats, enhance efficiency and generate insights

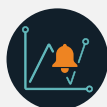

Reveal Connections

Automatically analyze vast amounts of data, and reveal seemingly hidden relations between identifiers

Visual Link Analysis

Visualize intelligence in advanced graphs to comprehend data connectivity, analyze networks, and connect the dots in various views

Real-Time Alerts

Define various inputs to trigger automated real-time alerts. Be aware of ongoing incidents and critical information

Dynamic Reports

Generate automatic reports presenting comprehensive and dynamic view of entities, producing actionable intelligence

Domains

Law Enforcement

Government

Financials

Corporations

Our Platform

Cobwebs' platform was designed by intelligence and security experts as a vital tool for searching and analyzing data from publicly available sources, open, deep and dark web.

Our exclusive technology extracts targeted intelligence from big data using the latest machine learning algorithms, finding hidden leads and connecting the dots.

Designed to meticulously race through and scan the web's endless digital channels, our solution analyzes huge sums of data to help you automate your investigations, gain situational awareness and provide security fueled by intelligence insights.

Key Features:

- Search and analysis of publicly available data from the open, deep and dark web
- Extraction of context, identifiers, locations and networks from unstructured web data
- Streamlined artificial intelligence algorithms producing actionable insights
- Automated real-time alerts on potential risks, events, and critical incidents

Streamlined Artificial Intelligence

Search
surface, deep
and dark web

Access
millions of
sources

Extract
numerous
identifiers

Analyze
various data
types

Visualize
location
data

Detect
risks and
threats

Customer-Centric

Cobwebs Technologies is delivering unparalleled expertise in intelligence-enhanced security, providing insightful and comprehensive AI-Powered web intelligence platform.

Our intelligence masterminds and expert teams developed powerful and award-winning technology to enable smooth, seamless operations across various industries and use cases.

With impeccable customer service partnered with robust technology, our comprehensive customer training employs strategic methodologies and veteran operational experience.

About Cobwebs Technologies

Cobwebs Technologies provides innovative technology that is revolutionizing open-source intelligence with advanced AI-driven solutions.

Our end-to-end solutions are designed to law enforcement, national security, financial institutions and corporations and tailored for their operational needs.

With our multifaceted approach, our technologies address today's complex hurdles and evolving challenges to protecting communities, organizations, assets, and people.
