

Collaboration with Doxis & Microsoft Teams

Doxis SmartBridge for Microsoft 365/Teams

In many companies, employees use Microsoft Teams on a daily basis. It is, of course, very easy to share documents in Teams and discuss and edit them in meetings and chats. But where are the documents actually stored? SharePoint? OneDrive? Most people only think about this when the documents are needed again later on.

With Doxis SmartBridge for Microsoft 365/Teams, companies maintain control over their content. Doxis adds intelligent information management to Teams, brings Teams content into the correct context and securely stores documents and chats.

Your return on information

> Single source of truth

Brings Teams content, including chats, into the correct business context and makes them accessible outside of Teams

> Maintain control

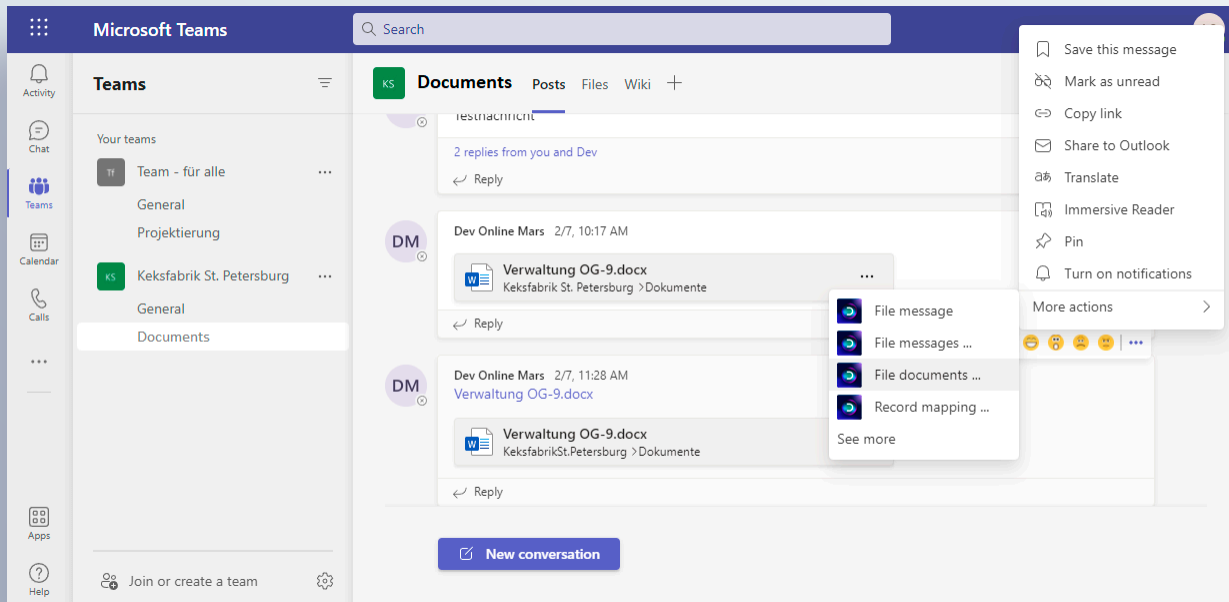

Prevents chaos in document handling and ensures compliance through documentation & data security throughout the information lifecycle

> Real-time communication & information governance

Unites ad hoc collaboration & real-time communication with intelligent information and process management

> Connects information islands

Makes content from outside the Microsoft ecosystem directly available to Teams users. Provides a 360° view of customers, suppliers and projects

Collaboration works with Microsoft Teams & Doxis

- **Teams content in context**
Bundle content from Teams and other systems in Doxis workspaces and access it in Teams
- **Securely store Teams content**
File important documents, messages, protocols and more from Teams in a structured manner in Doxis and apply retention rules as needed
- **Individual workspaces for each Team**
Assign a separate Doxis Workspace for data and documents to each Team, accessible by all members of the Team
- **Archive chats**
File business-relevant chats in Doxis in a compliant manner and use full-text to search for them

Leading companies trust Doxis

“Our interconnected eFiles act as central access points to documents from a range of sources, including SAP documents, emails, MS Office, etc. and help us make ongoing improvements in many areas, such as customer service.”

Bernard Krone Holding SE & Co. KG

“That’s what makes electronic work so effective: The workflow system now handles the entire process. No steps are skipped and everyone involved is informed via email in Outlook if a new task is waiting in their workbaskets.”

Raffinerie Heide GmbH
