OneVue*x* – Advanced AI Technology for Modern Government Workplaces

Disruptive global events exposed inefficiencies in government – outdated legacy systems, on-premises networks, siloed agencies, and security vulnerabilities. In the age of AI, transformative technologies like Cloud and generative AI have quickened the pace for AI | Digital transformation required to better engage citizens, empower employees, optimize operations, and reinvent government services and business models with flexible, integrated, and trustworthy solutions. These advanced technologies provide operational agility; major changes in work processes; remote access and collaboration; security that meets EO standards of Zero Trust to improve public services; and sustainable programs and responsive solutions. Modernization is critical but transformation can be difficult to achieve.

OneVue*x* Unified Systems and Microsoft Solutions provide government organizations the technology and innovation they need to achieve more efficient, cost-effective digital transformation by delivering advanced computing power that is easy to use, customizable, adaptable to change, and secure, with less IT maintenance and expense. With OneVue*x* Unified Systems, it's easy to integrate systems, expand operations, and replace outdated technology with solutions that meet the needs of today's Modern Workplace.

OneVue*x* – Advanced Technology for Modern Government Agencies

OneVue*x* is a **secure AI driven digital knowledge network and productivity content center** that intelligently integrates data, content, insights, and technology solutions (on-premises to cloud), displaying combined results through a single interface. With OneVue*x,* **generate ideas and content faster, complete time-consuming tasks,** and **gain AI driven insights** with **advanced security incorporating Zero Trust strategies.** Experience up to 40% more productive teams, reduce IT expenses, and achieve adaptable, flexible systems, with advanced security that protects information wherever it resides.
OneVue*x* reduces the complexity and expense of digital transformation, with powerful AI, integration tools, and security at the speed of AI.

Integrate solutions – on-premises to cloud

AI and enterprise search, finds info in all connected systems

Connect to people and content from any location

Securely access, share, and protect sensitive information

What Government Agencies Can Achieve with OneVue*x*

OneVue*x* Unified Systems seamlessly integrates Microsoft and non-Microsoft solutions with flexibility to easily customize systems to meet your specific needs. OneVue*x* expands the capabilities of your existing technology while eliminating older, more costly systems elevating your organization to a new level of performance.

Picture this

Innovation and productivity are challenging if you can't find, access, relate, or share information or easily integrate modern technologies.

You experience difficulties collaborating and gaining a complete picture of projects or organizational insights.

Maintaining safety and security across disparate apps, platforms, devices, and systems is challenging.

With OneVue*x* Unified Systems and Microsoft Solutions

Achieve customized solutions, enterprise search, and collaboration:

- **Generate better ideas and results** with integrated apps, platforms, and systems like M365 GCC, Microsoft Copilot, SQL, IBM, Oracle, Salesforce, specific to your agency's needs.
- **Accelerate productivity and innovation**, accessing and sharing information in all connected solutions (Microsoft and non-Microsoft), on-premises to cloud, easily incorporating innovations like AI.
- **Stop searching, just ask OneVue*x*** to find all related information with **AI, Digital Subject Cards, and Topic Pages** without remembering filenames or their location.
- **Experience at least 40% greater productivity** with teams that collaborate across multiple environments, generating greater, more confident results.

Work smarter with greater vision working anywhere on any device:

- **Work fluently across systems,** accessing all connected solutions with **controlled access** from a single familiar interface and one log-in.
- **Stay connected to teams regardless of location** with a 360° view of systems and operations, synched across devices in real-time.
- **Achieve greater insights and transparency** with a complete view of the organization, with real-time analytics and business intelligence reports live streamed in custom dashboards.
- **Experience greater productivity** with **AI, Digital Subject Cards,** and **automated Topic Pages** that connect related sources of information for faster accessibility.

Protect your organization at the speed of AI with Zero Trust Architecture:

- **Work safely,** managing projects on most devices, assured that information in all environments is protected, on-premises to cloud.
- **Experience unmatched security** with the integration of multiple Microsoft security systems, including Microsoft Security Copilot – advanced security with AI and Zero Trust architecture, securing endpoints, end users, and infrastructure from on-premises to multi-cloud environments.
- **Protect all connected systems and devices** from cyberthreats like malware, phishing, ransomware, and viruses.
- **Monitor devices and people for added safety** with multiple layers of security, including geolocation, meeting all compliance standards.
