

BI at scale: Integrate insights into the daily work flow and drive actions.

ABOUT CS Power BI Envisioning: 1-day workshop

In the past, reporting and IT were synonymous. CS tries to bring IT forward as the enabler for the organization. Power BI allows for business users to easily create new reports in order to replace manual processes that relied on Excel, VBA and Power Point. IT can facilitate this adoption of Power BI by providing trainings, a community and general consulting. In our workshops we visit all of this aspects.

1 Day Workshop – COMPACT APPROACH – IMMEDIATE RESULTS

Envisioning & Use Cases

Goal:
An envisioning session to bring everyone on the same page. This will cover benefits of Power BI and its positioning, examples of use cases and a design-pattern for Power BI-based report solutions.

Deliverables:

- Use case heatmap (quick wins vs. big ones)
- Use case and tool mapping
- Comparison with other Power BI solutions

Hands-on

Goal:
We show the ease of the tool by putting you in the pilot seat and giving you a hands-on session on building your first reports from scratch thus visiting a lot of the capabilities of the tool.

Deliverables:

- Report building
- realization of your vision
- Handout with further recommendations and impulses

Power BI Concept

Goal:
We analyze the current situation and create an individual high-level vision for the use of Power BI service. We outline a concept for strategy and governance

Deliverables:

- Implementation roadmap
- Recommendations and success factors
- Risks and dependencies
- Effort estimation

Rollout

Goal:
For a proper rollout of the platform, we ensure scaling effects and remove road blockers right from the beginning.

Deliverables:

- Roll-out roadmap addressing different aspects like evergreen, workers council, community
