Integrate information – on-premises to cloud	AI and enterprise search, finds info in all connected systems	Expand client engagement with secure remote access	Ensure employees, clients and systems are secure

What Your Business Can Achieve with OneVue*x*

OneVue*x* Unified Systems seamlessly integrates most computing solutions with flexibility to easily customize systems to meet your specific needs. OneVue*x* expands the capabilities of new and existing technology producing greater functionalities, insights, and results while eliminating older, more costly systems.

Picture this

Innovation and productivity are challenging if you can't find, access, relate, or share information or easily integrate modern technologies.

You experience difficulties collaborating, gaining project insights, or providing clients the tools and capabilities they need for success.

You struggle with safety and security in apps, platforms, devices, and the organization.

With OneVue*x* Unified Systems and Microsoft Solutions

Achieve customized solutions, enterprise search, and collaboration:

- **Generate better ideas and results** with integrated apps, platforms, and systems like M365, Microsoft Copilot, SQL, IBM, Oracle, SAP, Salesforce, etc., specific to your business needs.
- **Accelerate productivity and innovation**, accessing, sharing, and working with information in all connected solutions (on-premises to cloud) with powerful AI.
- **Stop searching, just ask OneVue*x*** to find all related information with **AI, Digital Subject Cards, and Topic Pages** without remembering filenames or their location.
- **Experience at least 40% greater productivity** with teams that collaborate across multiple environments, incorporating AI tools for greater, more confident results.

Work smarter with greater vision working anywhere on any device:

- **Work fluently across systems,** accessing all connected solutions **with controlled access** from a single familiar interface and one log-in.
- **Stay connected to teams and operations regardless of location** with a 360° view of systems and operations, synched across devices in real-time.
- **Achieve greater insights and transparency** with a complete view of the organization**,** with real-time analytics and business intelligence reports live streamed in custom dashboards.
- **Experience greater productivity** with **AI, Digital Subject Cards,** and **automated Topic Pages** that connect related sources of information for faster accessibility.

Protect your organization at the speed of AI with Zero Trust Architecture:

- **Work safely,** managing projects on most devices, assured that information in all environments is protected, on-premises to cloud.
- **Experience unmatched security** with the integration of multiple Microsoft security systems, including Microsoft Security Copilot – advanced security with AI and Zero Trust architecture, securing endpoints, end users, and infrastructure from on-premises to multi-cloud environments.
- **Protect all connected systems and devices** from cyberthreats like malware, phishing, ransomware, and viruses.
- **Monitor devices and people for added safety** with multiple layers of security, including geolocation, meeting all compliance standards.
