

**OCUCO**

The next generation  
of eyecare software  
is here

This is omnichannel  
eyecare  
software.

# The world is changing at an unprecedented pace

Patients no longer engage using a single channel; access is now expected across many different channels.

Online retailers are capturing patients by providing personalised digital experiences.

The demand for omnichannel eyecare is growing.

It's time to embrace new technology to enhance and elevate the retail experience.

# Introducing Acuitas 3 OmniChannel Edition

## OmniChannel

Enables a consistent online and in-person patient experience across all channels. A single view of the customer. A single view of your business.

## Scalable

Acuitas 3 is built to scale.

## Secure

ISO-certified, GDPR and HIPAA compliant, ensuring all data remains secure.

## Cloud-Based

Allows access to any device anytime, anywhere, removing the need for extensive hardware requirements.

Move from feeling  
behind the curve, to knowing that  
you're always ahead of it.

# A specialist industry needs a specialist software partner

At Ocuco, we're building the digital infrastructure on which eyecare businesses of the future will thrive. You perfect people's sight; we perfect the technology.

Prioritise the person behind the lens, delivering best-in-class care to your communities while growing your business with Acuitas 3.
