Custom Actions: build custom processes not limited by platform connectors or flows

Custom Action

Do you know what a custom action is? 🤔

Custom Actions will allow you to create your own type of actions if any of the existing ones is not meeting your needs. If you need more info about custom actions, press the button below.

[Tell me more](#)

Upload NuGet Package

The NuGet package for a custom action should contain properties of the action like its name, description, decorators, etc. Below you can set a custom action name and icon, which are different from what you upload in the NuGet package. The custom name and icon will be displayed in the actions toolbar.

Action Details*

 Type your action name

FILE TYPE
.nupkg

FILE SIZE
Maximum 100 MB

NEED AN EXAMPLE?

From 2022: connect to datasources, frontend builder, marketplace & IoT

The screenshot displays the PROCESIO Data Model Designer interface. On the left is a sidebar with navigation options: Dashboard, Credentials Manager, and a section for DESIGNERS containing Process Designer and Data Model Designer. The main area shows the 'Data Models / File' configuration. A table lists attributes with columns for Display Name, Name, and Type. Each row includes an 'Add Attribute' button, an 'Edit' button, and a delete icon.

	DISPLAY NAME	NAME	TYPE		
<input type="checkbox"/>	File path	path	string	Edit	
<input type="checkbox"/>	File size	size	float	Edit	
<input type="checkbox"/>	Type	mimeType	string	Edit	
<input type="checkbox"/>	File name	name	string	Edit	
<input type="checkbox"/>	File id	id	string	Edit
