FactoryTalk® Energy Manager™

The Industrial Energy Management and Optimization Solution

Rockwell Automation

expanding **human possibility**®

PUBLIC

Pressure points driving focus on energy

Achieve digitization and sustainability goals

FactoryTalk® Energy Manager™ Overview

The Industrial Energy Management and Optimization Solution built on an Industrial DataOps Platform

CAPABILITIES

- **Aggregate energy and operational (OT) data** from disparate sources
- **Monitor, analyze and compare energy performance** in real-time across the enterprise
- **Understand & optimize energy and emissions** with contextualized analytics
- **Data driven CO_2 emissions reporting** for scope 1 & 2

BENEFITS

- **Faster time-to-value** with a purpose-build application (Configuration based SaaS application)
- **Transform siloed data** into actionable insights (make data valuable)

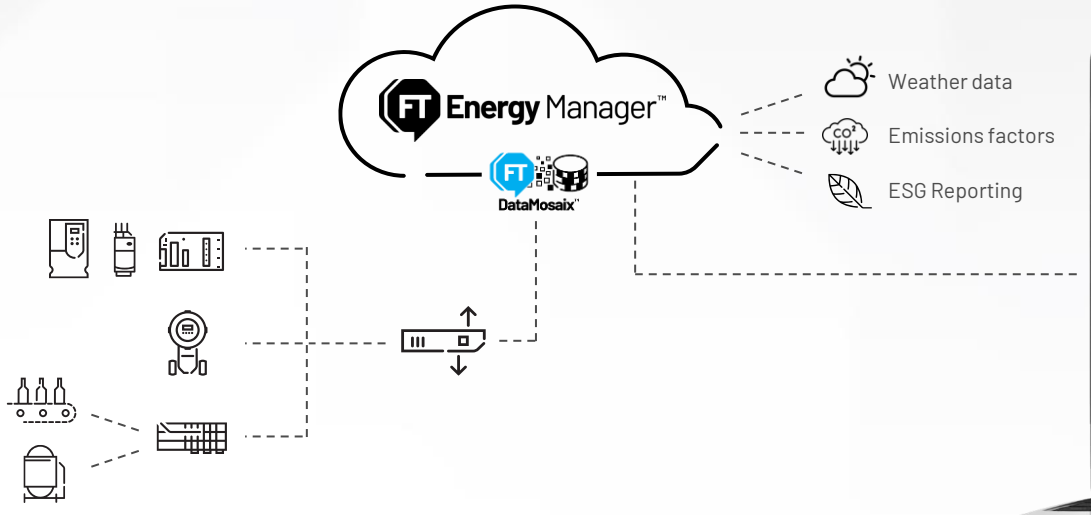
OUTCOMES

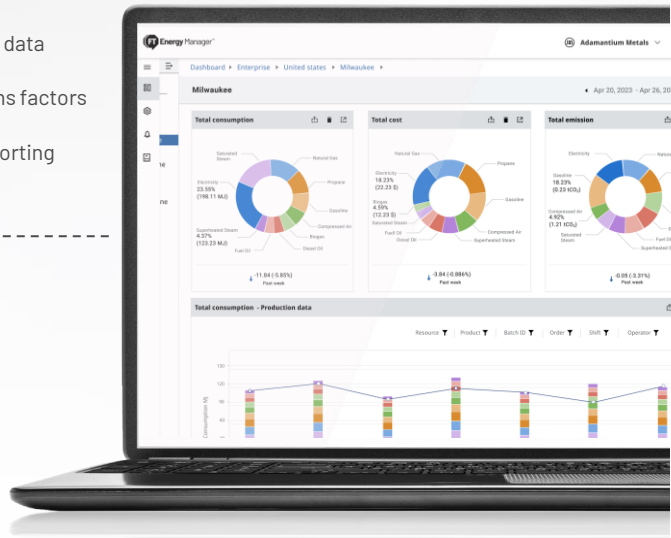
Improved awareness
Energy usage by production process, batch or asset in real-time

Reduce Energy Costs
by understanding energy usage and identify areas for savings

Increase Profits
by avoiding peak demand charges

Achieve Digitization & Sustainability Goals
by increasing efficiency, and ensuring regulatory compliance





FT Energy Manager™

Customers aim for net-zero - FactoryTalk Energy Manager is the foundation for any strategic energy management program to connect, monitor analyze energy consumption and derive emissions (Scope 1 and 2). Furthermore, our industrial energy monitoring and optimization solution will help to understand energy data with contextualized analytics.

CLOUD NATIVE

Break through your data silos to make better business decisions

MULTI-SITE

Gain real-time insights across your operations

SCALABLE

Reduce complexity and lower total cost of ownership

FASTER TIME-TO-VALUE

Reduce development time and benefit from automatic updates and product enhancements

expanding **human possibility**®
