

How To Bring AI To Your Business

We help optimize your business performance with Microsoft Azure AI solutions

12/3/2020

Gold Data Analytics

Companies want to optimize their operations by streamlining business processes

Forward thinking organizations are constantly looking for ways to eliminate operational bottlenecks, improve productivity, lower costs and increase profits. Legacy applications will be modernized and deployed in the Cloud. Paper notes and Excel apps will be a thing of the past. Repetitive mundane processes will be automated with AI. Customers and employees will have 24X7 response from chat bots. Potential applications of AI/ML is virtually unlimited.

CHALLENGES

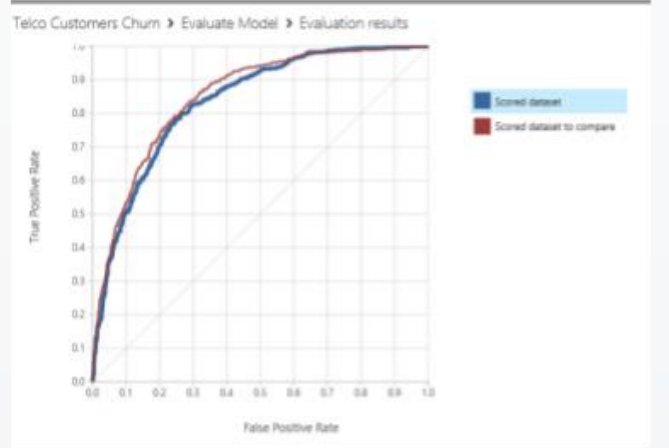

There is a limited amount of IT resource to deal with seemingly endless opportunities to improve business performance. Legacy applications are running out of steam and not addressing modern needs. Disparate data sources need to be consolidated and accessible by AI based applications and BI tools.

IDEAL SOLUTION

Quadbase Systems provides Consulting, intelligent App development services using leading edge AI and machine learning technologies Microsoft Cognitive Services, Microsoft R, Python, SQL Server, Azure Synapse Analytics and Azure Databricks

DESIRED OUTCOMES

Modern intelligent Apps deployed in the Cloud and run on desktop as well as mobile devices. Chat bots on different deployment channels. Repetitive, labor intensive processes automated. Bottlenecks in business processes solved. Impactful ROI as a result.

Our experts in MS AI/ML platform bring AI to business

Our Microsoft-certified, AI/ML professionals provide expertise on developing customized intelligent applications and predictive analytics and managing deployment to achieve optimized results.

1

Leverage intelligent Apps to streamline business processes

Enjoy our low up-front costs, risk-free proof of concept, and bespoke service to meet your requirements.

2

Increase productivity and profits

Realize significant ROI at a fraction of the cost of hiring teams of developers and data scientists.

3

Benefit from the Microsoft Azure and AI/ML services

The platforms offer rapid development the most comprehensive set of ML algorithms and cognitive services.

Quadbase Systems' Consulting and App Development Service & Microsoft Power Platform

Our team works with your business analysts and stakeholders to evaluate your existing business processes and pain points, understand the data and metrics that are important to your organization. We discuss use cases that can be streamlined and automated and create implementation road maps.

Accelerated development life cycle

Feature rich rapid development platform allows easy prototyping, testing and deployment into production.

Comprehensive end-to-end business solutions

We provide best-in-class solutions in BI, custom Apps, chatbot, business process automation and RPA.

Built-in security and auto-scalability

You can start small and scale via role-based access, custom roles, and built-in mechanisms for identity authentication.

Customer success: A breakthrough in a business process automation

Quadbase Systems delivered end-to-end enterprise solutions that streamline and modernize customer's operations. AI and RPA take mundane, tedious tasks from humans, shift them to bots and reduce errors. Customer retention rate improved due to better customer engagement. Productivity increase means cost savings.

Modernized customer engagement

Artificial intelligence based chatbots integrated with a number of services, authenticate users, answer simple questions and route customer support issues to live agents when necessary.

Automated multi-stage approval process

By leveraging Power Platform, the client's approval process was improved from one to three weeks to one to three days, saving valuable time. Additionally, the client's approval history is automatically preserved, thereby ensuring traceability.

Improved productivity through RPA and form processor

Robotic process scans emails and attachments for invoices. Power Platform's AI form processor extract necessary information from invoices to close the process in Accounts payable system.
