

Secure your Digital Future

Continue to progress your journey to the Cloud with Confidence: Enterprise-grade, Industry-aligned, Compliant and Secured

Avanade's Multi-Cloud Security Offering

In today's ever-evolving digital landscape, transitioning to the cloud or scaling your existing cloud infrastructure can expose your organization to a wide range of threats.

Staying ahead of these risks becomes a daunting task as your environment evolves, and new regulations emerge. At Avanade, we understand these challenges, and our Multi-Cloud Security offering is designed to provide you with the confidence and peace of mind you need.

With Avanade's Multi-Cloud Security offering, you can confidently embrace the cloud while maintaining a strong security posture.

Let our expertise and comprehensive solution empower your organization to overcome the challenges of multi-cloud security. Contact us today to learn more about how we can support and protect your cloud journey.

Our proposition

Cloud Security Control Framework

Our advanced Security Control Framework acts as impenetrable guardrails for your cloud infrastructure. It ensures that your data remains secure and compliant by enforcing industry-leading security standards at every level.

Patterns and Practices

Our solution comes equipped with curated Patterns and Practices, offering you expert guidance on securing your multi-cloud environment.

These proven methodologies streamline the implementation process and empower you to make informed decisions that enhance your overall security posture.

Defender for Cloud

To fortify your cloud defenses, we integrate Microsoft Defender for Cloud with Azure Arc into our offering. This powerful tool provides comprehensive threat detection and prevention capabilities, safeguarding your workloads and infrastructure from potential attacks.

We enable you to continuously assess the security posture of your multi-cloud resources. It offers real-time insights into any vulnerabilities or misconfigurations, allowing you to proactively address and resolve them promptly.

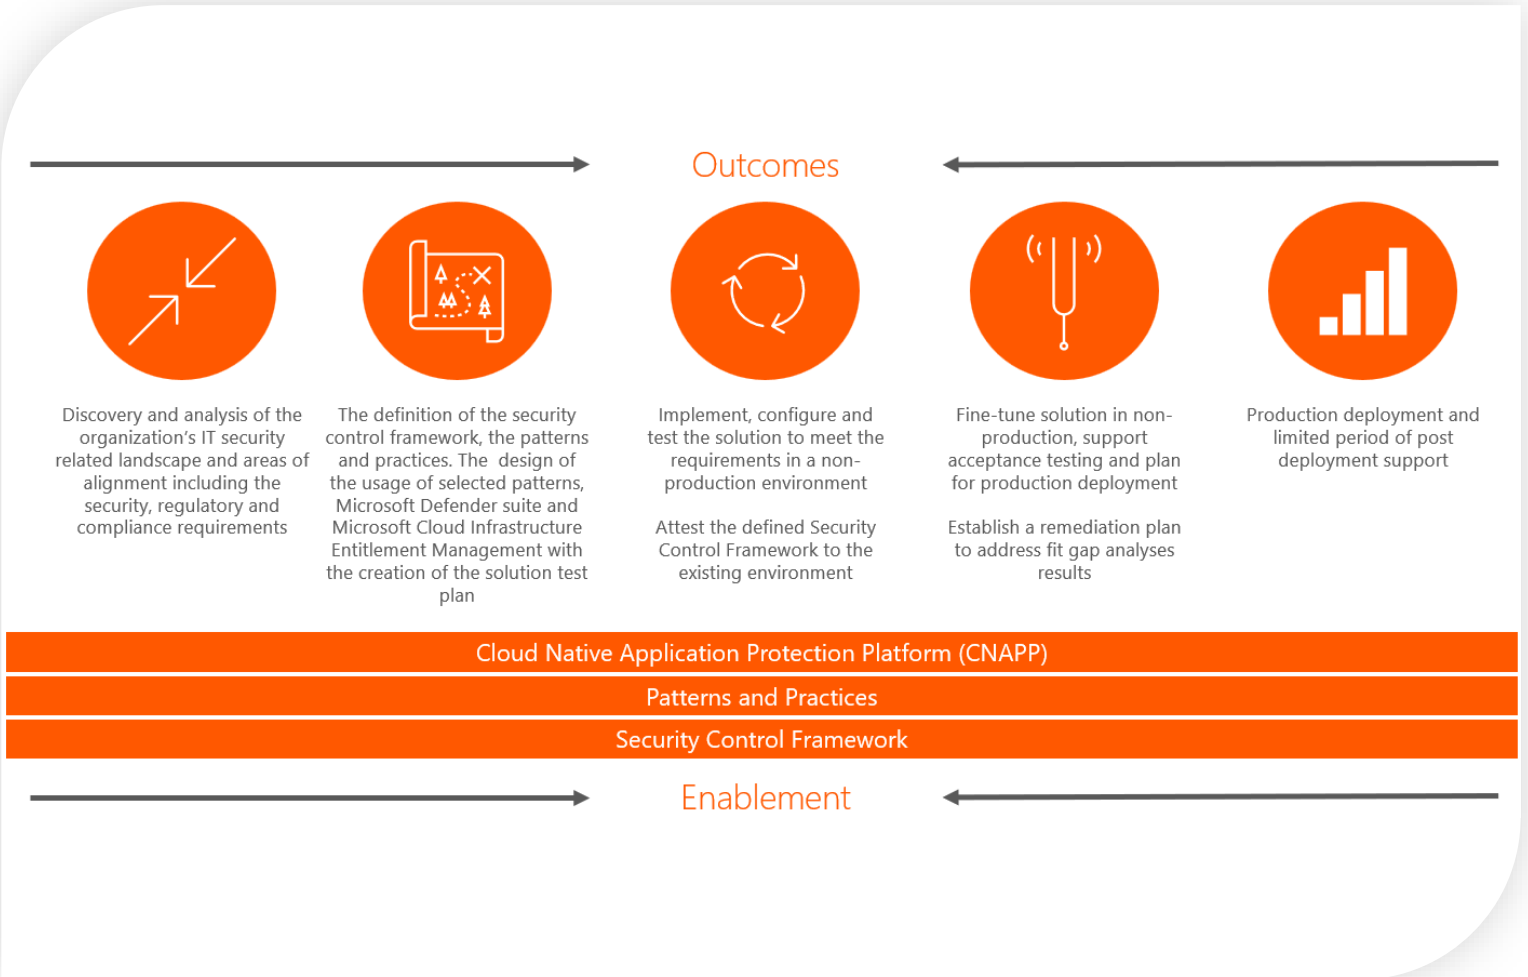

Your workloads do enjoy an additional layer of protection. We extend the capabilities of Microsoft Defender for Cloud to safeguard your applications, ensuring their resilience against emerging threats.

Permissions Management

To further enhance your security measures, our offering includes advanced Permissions Management features with Microsoft Entra. It allows you to precisely control and manage access permissions, granting or revoking privileges based on user roles and responsibilities.

What we deliver to you

Unparalleled expertise in **securing** the **Microsoft** platform

 Advanced Security Specialization	 End-to-End Capabilities	 Global Presence	 Trusted Advisor with unique expertise
In designing and integrating the right Microsoft and 3rd-party security solutions with a focus on security simplification without compromise	Transform, evolve and secure your cloud platforms and workloads via Avanade's security and cloud managed services.
