# Enabling Enterprises Initiate and endure on their Sustainability Journey leveraging SIAD workshop for Goals-that-matter in Sustainability

## Challenges

- Need to understand the importance of Sustainability – why it matters?
- Need to define and track the most relevant sustainability goals
- Need to be updated on the regulatory frameworks
- Need guidance/ direction on kickstart sustainability journey (or evaluate existing practices)

## Ideal Solution

- Collaborative workshop to explain sustainability concepts
- A structured approach to the ESG metrics
- Guidance on Way forward – An Action plan
- Access to Industry standards, Best Practices and Thought Leadership
- Reusable resources and templates
- Monitor outcomes that help in course correction

## Desired Outcomes

- Identify potential areas and pain points in Sustainability journey
- Clear view of key ESG goals and their alignment to regulatory framework
- Prioritize, Design & Contextualize to kick start the implementation
- Align KPIs with Business and Service lines
