Azure Networking Assessment

Understand how your network needs to change for a move to Azure.

Is your enterprise network designed to be cloud-ready? Transitioning to the cloud without optimising these networks can lead to increased costs, security vulnerabilities, operational complexities, and negative impacts on user experience.

That is why we offer an assessment service to help your organisation streamline your networks for the Azure cloud platform. Our complimentary 4-hour Azure Networking Assessment will provide you with a high-level cloud networking strategy and actionable next steps to help you optimise Azure Networking Services for your workloads and integrate it successfully with your existing network.

Azure Networking Assessment Scope

Evaluate your current cloud networking state and review your desired goals and options for optimisation and improvement.

Review the Azure Services applicable to your specific use case, discuss the technical feature of each, and compare costs between options (e.g. Express Route, Virtual WAN, Azure Front Door, Application Gateway, Azure DNS, etc).

Recommend ways to optimise your workloads for Azure Networking Services.

Other Key Information
- 4-hour assessment.
- Delivered virtually through Microsoft Teams.
- Delivered by our Azure specialists at no cost.

About Professional Advantage

Professional Advantage is an international IT consulting and solutions company with over 30 years of experience in helping organisations achieve more by improving their business systems and securing their hybrid workplaces through industry-leading software solutions. Originating in Australia, it is one of the country's most awarded solution providers. Our 300-strong global team covers three continents and has successfully worked with over 1000 organisations.
