TEAMS

INVENTORY ASSESSMENT

2022

Overview

A glimpse at our Slack Inventory Assessment process!

When you are planning for migrating from Slack to Teams, you need to understand and know what we do in the Slack Inventory Assessment and why we do it.

Inventory assessment basically helps you discover your workspace, determine the data load in channels/chats, members, and everything in it and plan for migration.

✦ High-level Inventory and Detailed Inventory

When you get high-level inventory details, you can plan for channels/chat list and decide on what needs to migrate.

With this, you'll get details of all the Slack channels/ conversations with Channel/ chat name, Channel/chat type, Created by, Created at, Archived status, Last message posted date in channel/chats.
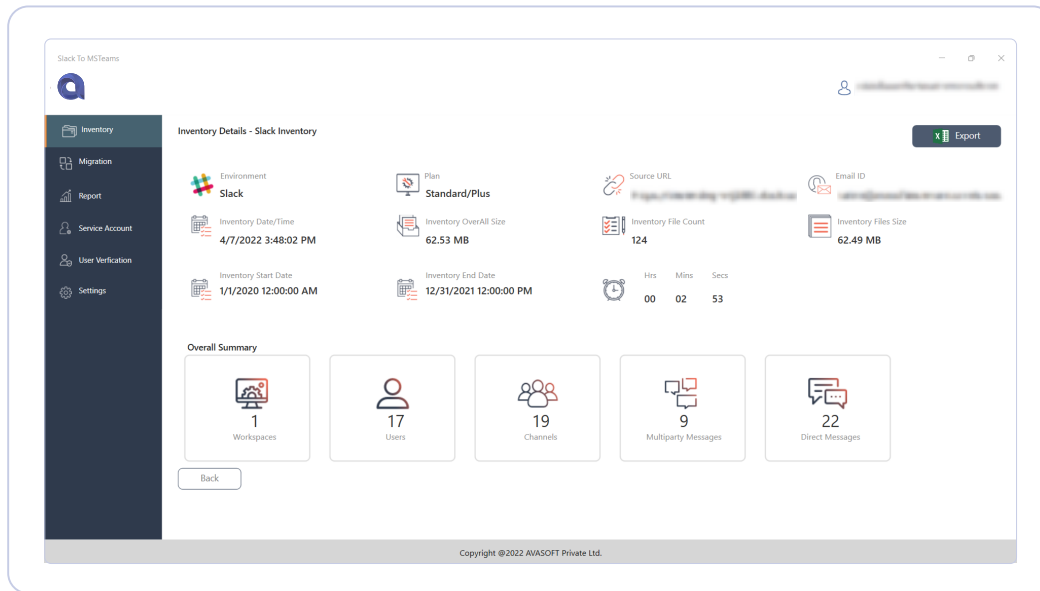

High-Level Inventory

ChannelName	ChannelID	CreatedBy	ConvoType	CreatedAt(UTC)	Archieved	ChannelType	LastPostedDate
general	C02JT0H7XTR	Calvin J	Channel	27/10/18	False	Public	17/05/22

Detailed Inventory

In Detailed Inventory, you'll get details about the overall Slack workspace.

You'll know the User's details with roles, Channels/chats list with members' details, the overall message count (User-posted and Bot posted), files details, channel type (Public/private/external shared), Created by, Create At, Archived status and configured apps list.

Based on the above High level or Detailed inventory details like last active status, Archive status, low message volumes, can be used to filter or sort the unused channels/chats (which no need to be migrated) with a better level of understanding.

✦ Custom Inventory based on user choice

With custom inventory, you can plan for Slack channels/chats inventory based on your usability.

Customize with the content time period

And if you want messages and files for a specific period only like 6 months, 1 year, you can get the inventory according to that too.v

Customize with Slack channel/conversation

If you want only the recent Active or most used or selective important channel/conversation, you can get the inventory for that specific channel/ conversation.

Users Inventory

UserName	Email-ID	Role	WorkspaceName	IsActiveUser
admin	admin@avasofttectenant.onmicrosoft.com	Full Member	Avasoft	Active

Channel Inventory

ChannelName	ChannelID	Type	Members	WorkspaceName	Purpose	CreatedDate & Time	CreatedBy	MessageCount	FileCount	FilesSize	OverAllSize	IsArchieve	HumanMessageCount	BotMessageCount
general	C02JT0H7X1	Public	17	Avasoft	include everyone. It's a great spot for	27/10/18 11:34	Calvin J	1521	69	57.14 MB	59.14 MB	Active	1519	2

DM Inventory

UserName	DMID	WorkspaceName	CreatedDate & Time	Initiated By	MessageCount	FileCount	FilesSize	OverAllSize	HumanMessageCount	BotMessageCount
Calvin J R,cathy	D03AD5HJFMF	Avasoft	04/04/20 17:05	cathy	5486	26	101.14 MB	105.14 MB	5481	5

MM Inventory

Users Name	MultipartyMessageID	Members	WorkspaceName	Purpose	CreatedDate & Time	CreatedBy	MessageCount	FileCount	FilesSize	OverAllSize	HumanMessageCount	BotMessageCount
Alexander R,Calvin J R,Henry	C03A2G81D3R	3	Avasoft	Group messaging with: @calvin @henry @alexander	07/04/18 8:34	Calvin J R	7491	5	1.89 MB	1.9 MB	7472	19

Timeline for migration and deployment

The migration timeline varies depending upon the inventory message volume and throttles limitations. With our extensive migration experience, we'd guide and plan your migration accordingly.

In case, you have a tight deadline for migration and have a huge data load, we'd go ahead with the multiple tool instances approach to complete the migration as early as possible.
