Power Platform ROI Accelerator Workshop

Challenges:

- Understanding the Power Platform product set, features and how they can be applied to your business challenges
- Enabling your user community while securing your most valuable corporate resources and data
- Measuring the return on your investment in Microsoft Power Platform and building a business case for adoption

How Rockhop can help:

Our team will work with key stakeholders in your organization to identify the top 3-5 business challenges and facilitate a half day workshop to formulate a high-level future state. During the workshop we will educate your team on the features of Power Platform, map them to the desired future state and define the ROI of solving these challenges.

Rockhop with provide you with an executive summary of workshop findings and solution mappings – outlining actionable next steps to enabling your business with Microsoft's Power Platform

What to expect:

We want to hear from the key stakeholders that would benefit the most from solving these challenges. Rockhop will conduct the following activities:

- A pre-workshop planning session to identify the business challenges and current investment
- A 4-hour workshop with key business stakeholders to dig deeper into your current state, educate your team on platform capabilities and develop a high-level future state
- An executive summary outlining our findings, target solutions, ROI of solving these challenges with Power Platform and actionable next steps.

Duration:

- 1-hour pre-workshop planning session
- 4-hour roadmap workshop
- 1-hour executive summary readout session
- 1-week total for workshops and executive summary development
Benefits:

- Understand Power Platform capabilities and how it can be used to solve your business challenges
- Understand ROI of utilizing Power Platform to enable productivity in your business
- Build a business case for utilizing Power Platform and accelerating problem resolution
