# SHOW ME THAT YOU KNOW ME WITH ACTIONABLE DATA

## COMPLETE WHOLE-PERSON-CARE VIEW

Dedalus Connected Care Platform powered by DC4H is built for the growing trend of "care everywhere" by enabling community-wide interoperability to truly achieve a 360-degree view of the individual.

- **CARE** Management
- **CLOUD PROUD**
- **CONSUMER** Engagement
- **BOOKING** Scheduling
- **CLINICIAN** Engagement
- **SOCIAL** Determinants
- **Dedalus Connected Care**

**Real-time access and insights about 'me'**

**6300** Healthcare Organizations

**Community level orchestration**

**+540M** Lives Impacted

**Achieve improved outcomes**

**Consumer Experience**
Build meaningful engagements and trust by personalizing care

**Care Team Well-Being**
Create a positive clinician experience with informational efficiencies at the point of care

**Quadruple Aim**

**One Person at a Time**
Curate data on an individual level and scale for populations at large

**Economic Efficiencies**
Reinvest in existing systems and untangle value hidden in the layers of data sources

## PERSONALIZE CARE EXPERIENCES, EVERYWHERE BY CONNECTING TECHNOLOGY, PEOPLE AND PROCESSES

# HYPER-OPEN ARCHITECTURE

**1**

### INTEGRATE
Support modernization of legacy applications by connecting and integrate existing and future systems.

**2**

### INGEST
All records belonging to a single consumer are matched to their integrated care record via Master Consumer Index, to ensure semantic equivalence.

**3**

### INDEX
Volumes of data normalized and stored in the integrated care record for clinicians to access usable data and achieve better outcomes and a healthier lifestyle.

**4**

### INSIGHT
Intelligent fabric components support investigative analysis of data for evidence based actionable insights and care planning.

**5**

### INFORM
Access to clinical information via a powerful "optical layer" displayed as clinical documents or atomic, finer-grained clinical data sets from resources stored in the integrated care record.

**6**

### INTERVENE
A set of defined business rules and automated processes offering action-based next steps through notifications and alerts.
