

All your data. All your teams. All in one place.

# DATA & AI PLATFORM ROADMAP

*with Microsoft Fabric*

As the landscape of tools for data acquisition, data engineering, analytics and data science has grown, organizations are having to spend more and more time managing integrations and architectures across multiple platforms, which ultimately creates roadblocks and hurdles to the business being able to quickly and effectively make data-informed decisions.

## Data & AI Collaborative Workshop

In this two day workshop, we walk through current and desired future state of modern analytics and opportunities and challenges related to enterprise-wide implementation. Together, we discuss strategy, desired state, data culture, governance, adoption and enablement.

- Learn the architecture & capabilities of Microsoft Fabric
- Uncover business value of Microsoft Fabric and the impacts to your data & analytics initiatives
- Prioritize use cases for adopting Microsoft Fabric
- Create high-level adoption roadmap emphasizing managed self-service analytics

## Sample Workshop Participants

### 3Cloud

Lead Data Architect  
Lead BI Architect

### Client

IT Infrastructure Admin/Owners  
Key Business Decision Makers  
Data Governance Leaders  
Licensing Administrators

Stakeholders  
BI Admins/Owners  
Analytics CoE Leaders  
M365/AAD Admins

# Reshape How Your Entire Team Uses Data with Microsoft Fabric

Take part in an immersive workshop, led by 3Cloud experts, to identify, prioritize and quantify use cases while mapping out requirements to future state Azure architecture. 3Cloud has built a Power Apps application that is integrated with Azure AI to do live demos with your data to prototype the use cases. With each use case, we document the problem, solution, projected business value and estimated cost.

OneLake

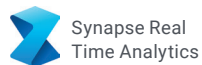

## Data Engineer

Visually integrate data from multiple sources

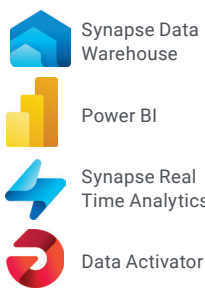

## Data Scientist

Transform & model data

## Data Analyst

Bring together more datasets & enable deeper insights

## Business Users

Uncover & shape intelligence needed to make critical decisions & drive innovation

## Microsoft Fabric Brings Your Data Into the Era of AI

- Ensure compliance & security while accessing data
- Equip your team with access to every tool
- Work seamlessly across all analytics workloads
- Take advantage of AI-powered features like Copilot
- Help your team connect data sources
- Easily build machine learning models
- Visualize results at the speed of light
- Empower better decision making

Your Data & AI Platform Roadmap may be eligible for Microsoft funding.

## Why 3Cloud

3Cloud was invited by Microsoft to be part of the Fabric private preview for feature testing and extended hands-on product development. 80+ 3Cloud team members participated to further extend their knowledge of Microsoft Fabric and provide feedback to Microsoft product teams through interviews and product update sessions.

3Cloud is your one accountable partner to deliver Azure infrastructure, data and analytics, and application development with the fastest time to value from our experience, tools and accelerators. 3Cloud is the largest pure-play Azure partner in the ecosystem with unequalled expertise in Azure. We have hundreds of Azure experts, including MVPs and Fast Track Solution Architects, with thousands of hours implementing cutting edge solutions with Microsoft's most advanced technology.
