

*Delivering Value*

MEGA

**MEGA, The Centralized Platform**  
One-Stop-Shop that brings them all together!

At eSense, in recent years, we had noticed the huge diversity of technologies, systems, services, and e-resources. Immediately, and in order to get the most benefits of this diversity, and not to start getting opposite results as this diversity becomes deeper, we realized the urgent need for a unified layer that aims to get the best of everything under one umbrella.

We ended up with a robust, flagship product named “MEGA”, the one-stop-shop that brings them all together...

**Mohammed Shouha, MEGA Technical Manager**

# MEGA Solution Brief

A systems/services integrator, adaptor and centralized portal that aims to get benefits of all organizations e-resources in a unified, organized, centralized, and fully controlled manner.

Using this system, the end-users will interact with one place in their day-to-day activities and operations.

MEGA

**01.**

Integrate both homogeneous and heterogenous systems and components

**02.**

Acts as a single-centralized hub to access everything

**03.**

Provides a portal that is accessible through all devices sizes

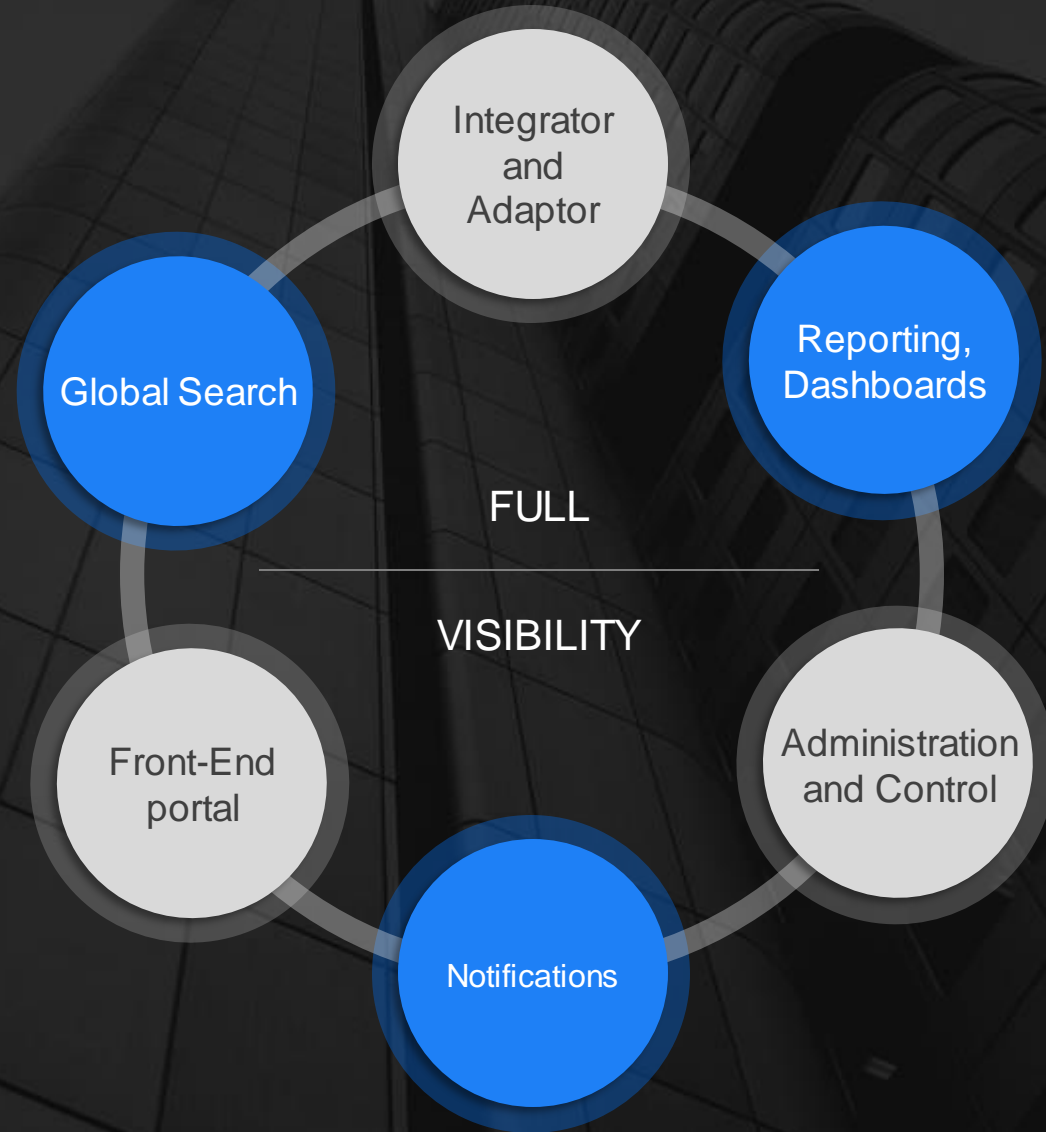

**04.**

Abstracts most of the infrastructure services and functions

# MEGA Modules/Components

One-Stop-Shop Access

# WORKING WITHOUT MEGA

MEGA CAN ANSWER THEM ALL!

Are you facing one of the following:

- 1 Your e-Tasks are scattered ?
- 2 Which system do which function?
- 3 Where is the information?
- 4 Your data is distributed in different databases?
- 5 Duplicate work?
- 6 Different reports results?
- 7 Information is not centralized?
- 8 Information is not secured?
- 9 Notifications come from everywhere?

# Key Success Factors

## Solid Back Office

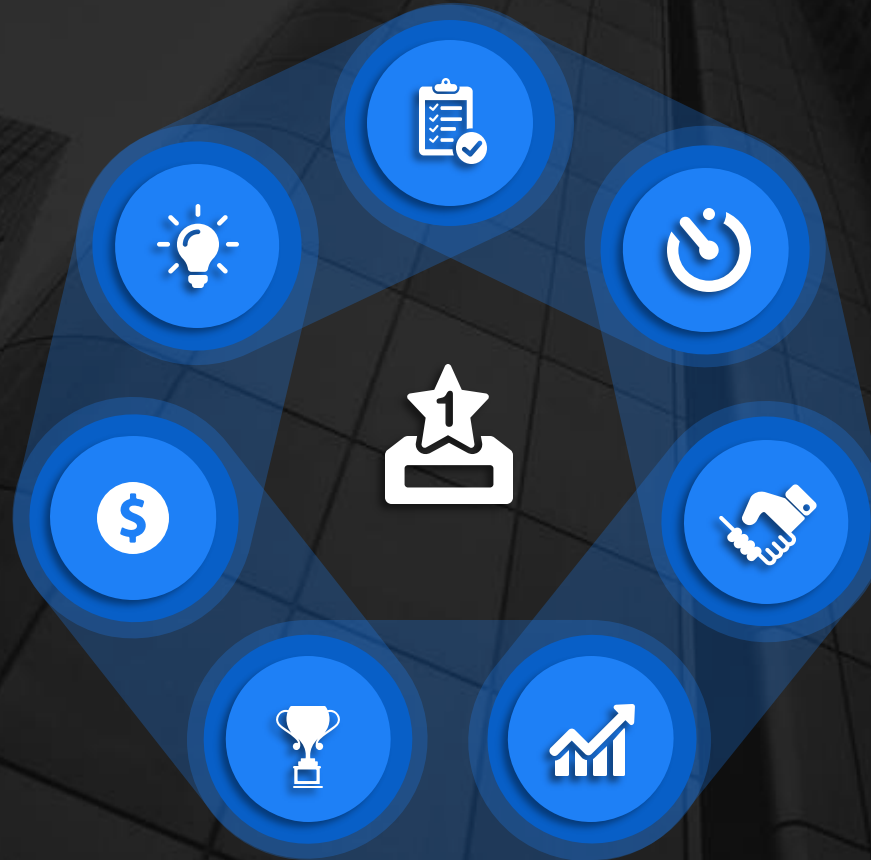

Solid back-office operations and support

## Saving

Do right implementation

## Experience

Solid track record

## Flexibility and Control

- Support for multiple businesses standards.
- Equipped with comprehensive reports and auditing tools

## Performance

Reduce delay time in processing documents and transactions

## Integration

Ability to integrate with other systems to automate the processes

## Reporting & Auditing

Comprehensive reports to support decision making, with the ability to audit

## Data and Security

### Hybrid Backup Model

- Automatic Backup with Hybrid AzureBackup, Optimizes Backup Operations at Best Network State, Secure & Reliable

## Scalable

### Azure Scalability Engine

- Cloud Service Performance Fully Optimized and Powered By Azure Scalability; Top notch performance

## Azure Multi-Tenants

### Supports Customer Tenants

- Customer can deploy Pylon-GRP at his own Azure Tenant and optimize resources as needed
- Pylon-GRP Supports Azure Web Apps and Azure IaaS Instances
