

## Verifiable Credentials are transforming your industry.

**Join a free workshop to learn how your business can benefit.**

In Gartner's Hype Cycle for Digital Identity, they note that Decentralized Identity and Verifiable Credentials (VC) are transformational technologies that *"will significantly improve data sharing, privacy, data security and data quality..."* For these reasons, Gartner encourages organizations to develop a business case and begin to trial Decentralized Identity and Verifiable Credentials.

Our workshop is designed to be the ideal first step for enterprise organizations.

### During this workshop, our team of experts will:

#### **Discuss the impact of VCs on your industry**

Learn how this emerging technology will impact Associations, Financial Services, Government, Healthcare, Manufacturing, Regulated Industry, Retail and more.

#### **Provide a technology overview and discuss business value**

Understand how the Issuer, Holder, Verifier trust model for data exchange works and how it improves user experience, privacy, security and business results.

#### **Brainstorm on priority use cases**

Identify high assurance and/or complex and time-consuming processes which could be significantly improved by adding VCs to your digital services.

#### **Demo the ease of deployment**

Demonstrate the ease of configuration of Microsoft Entra Verified ID and business processes with AffinitiQuest's Digital Experience Orchestration Platform.

## Business Benefits

### **Accelerate Digital Transformation**

Leverage portable, verifiable data to automate manual business processes

### **Delight Users**

Simplify digital services for citizens, customers and workforces

### **Increase Security**

Reduce the risk of fraud, breaches and account takeovers

### **Protect Privacy**

Empower users to own and control their data on their device
