

TEAMWORK SECURITY

Data breaches exposed 36 billion records in the first half of 2020.*

Every day, your employees access sensitive business information on multiple devices. Protecting that data is vital to your success as a business, and the best way to ensure that you mitigate risk, respond quickly to threats, and maintain a flexible workforce is through a managed security structure. Without expert management of your teamwork security landscape, many breaches go unnoticed. 53% of cyber-attacks are undetected and 91% don't generate an alert.** But with the Cognizant Microsoft Business Group (MBG) in your corner, any worry is replaced with peace of mind.

The Cognizant MBG's Teamwork Security managed service provides a comprehensive security monitoring and response service for Office 365 and other SaaS applications. This empowers employees to securely collaborate, access, and work from any location.

Benefits of a Managed Security Landscape

Reduce Risk

- Discover Shadow IT
- Activity Logging
- User Reported Phishing investigations

Elastic Workforce

- Zero Trust remote working
- Sanction and Unsanctioned Cloud Apps
- Data Sensitivity Controls

Rapid Response

- Automatic Threat Protection
- Anomaly Detection
- 24/7 Investigation

Why GO?

- Reduced Distractions
- Expertise On-Tap
- Faster TTV

Teamwork Security complements and integrates with your existing IT services, enabling your team to focus on providing great user support and working on initiatives that deliver significant business value. The Cognizant MBG efficiently handles the activities normally associated with security monitoring of your business, Office 365 and cloud application security events.

Built using cloud native technologies, the service has built-in support for alerts originating with Defender for Office 365, Microsoft Information Protection, and Microsoft Cloud App Security technologies. We also monitor using Microsoft Graph Security and provide detailed monthly reporting on all mitigating actions.

Whether it's the protection of cloud platforms like Office 365 or other cloud applications, Teamwork Security comprehensively secures your entire teamwork and collaboration platform.
