Cloud Enablement Workshop

Cloud Enablement Workshop

Do you want to modernize your IT with the use of Public Cloud technology? This means you need a solid foundation that meets the required guidelines and principles. The Centric Cloud Enablement Workshops will help you build this foundation for a successful journey to the cloud.

A solid preparation for your cloud journey

During the Cloud Enablement Workshops, we will introduce you to the design guidelines and teach you how to apply them to the needs of your organization. Together with all stakeholders, we make choices for the design of your Azure Landing Zone.

Besides all the technical aspects, during the workshops we have an eye for important organizational focus areas. We will answer various questions, such as: What does the transition to the cloud actually mean for your organization? How do you ensure proper assignment of responsibilities? What is needed for proactive management? This way, your cloud environment becomes truly future proof.

Key advantages

Best practices
The workshops are based on Azure best practices and guidelines, so you won't make the same mistakes as other organizations in their journey to the cloud.

Knowledge sharing
We transfer our knowledge and experience from previous implementation projects to your organization, for optimal realization of your cloud journey.

Blueprint
After the workshops, you will have a design document for the cloud migration and implementation that fits your organization.

● centric

Our approach

Based on the Cloud Adoption Framework, we start with the Azure Landing Zones design document. This approach was successfully applied at other Centric customers and is based on best practices and lessons learned from both Microsoft and the community. To draft up the design document, we organize several workshops.

In general, each topic will take 3 to 4 hours to complete. Based on the situation and organisational need, we will combine workshops in a way that fits your organisation best. You can count on 6 to 8 workshops of half a day each.

© centric
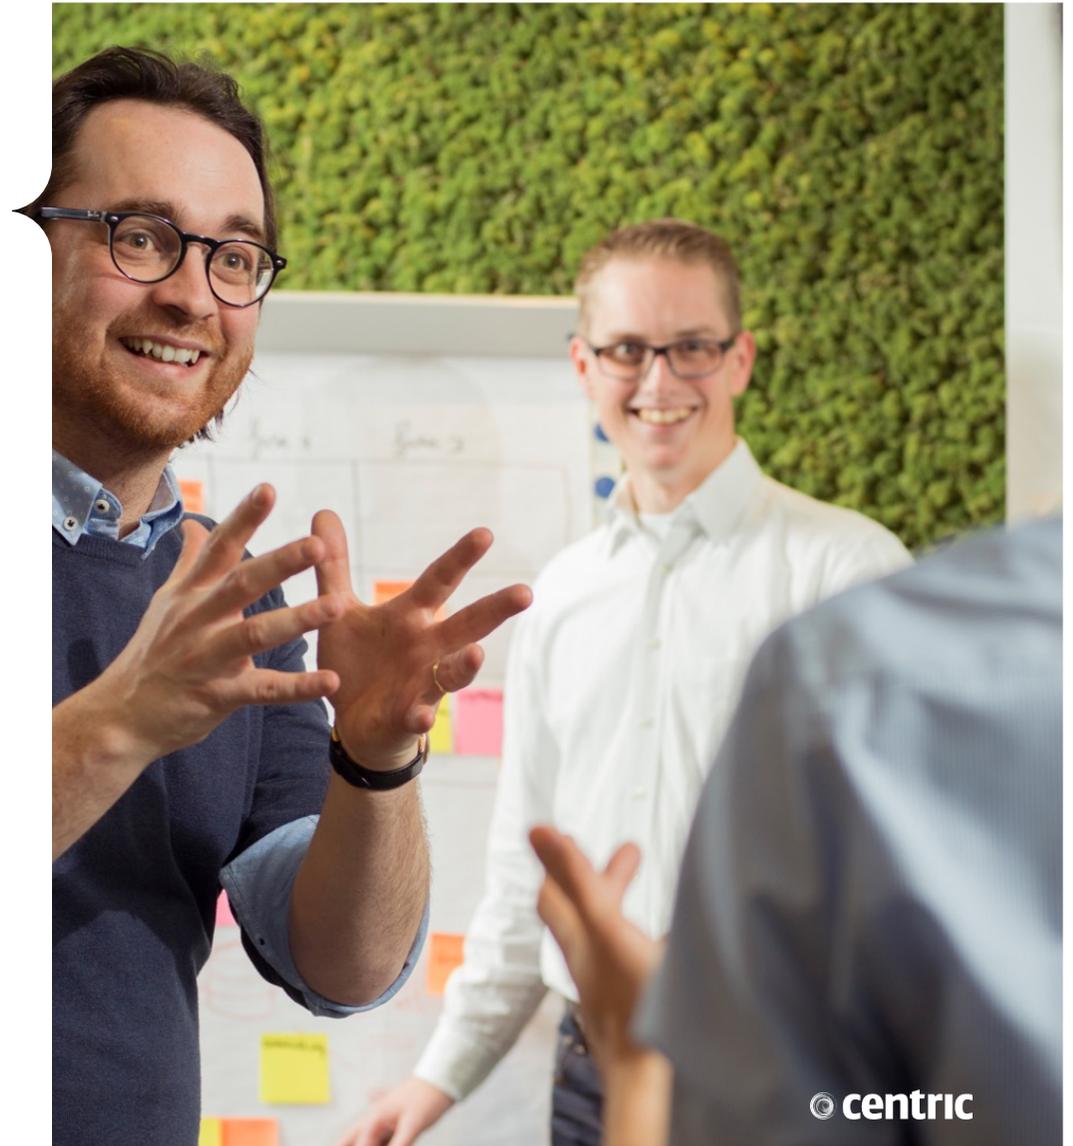

Landing zone design

During these workshops, the following Landing Zone Design areas are discussed:

Environment Design Areas

👥	**Azure billing offers and Active Directory tenants**
🪪	**Identity and Access Management**
👥	**Resource organization**
⚛	**Network topology and connectivity**

Compliance Design Areas

📋	**Management**
⛈	**Governance**
🔒	**Security**
⚙	**Platform automation and DevOps**
