ENHANCING EMPLOYEE EXPERIENCE

Unpacking Microsoft Co-pilot capabilities

Application Modernisation

DEVOPS MATURITY ASSESSMENT

OUR APPROACH

DevOps – the combination of Development (Dev) and Operations (Ops) teams – is an organisational approach that enables faster SDLC of applications and easier maintenance of existing applications.

DevOps facilitates shorter, more controllable iterations of your product(s) / workload(s) through the union of *people, process and technology*.

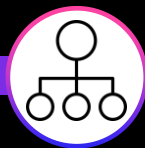

Many organisations have embarked on a DevOps journey in an organic manner, little direction and clarity to the desired outcomes often result in an inefficient approach to DevOps.

NASSTAR'S DEVOPS SMES CAN CONDUCT AN IN-DEPTH DEVOPS MATURITY ASSESSMENT TO:

Review &
Understand
Current State

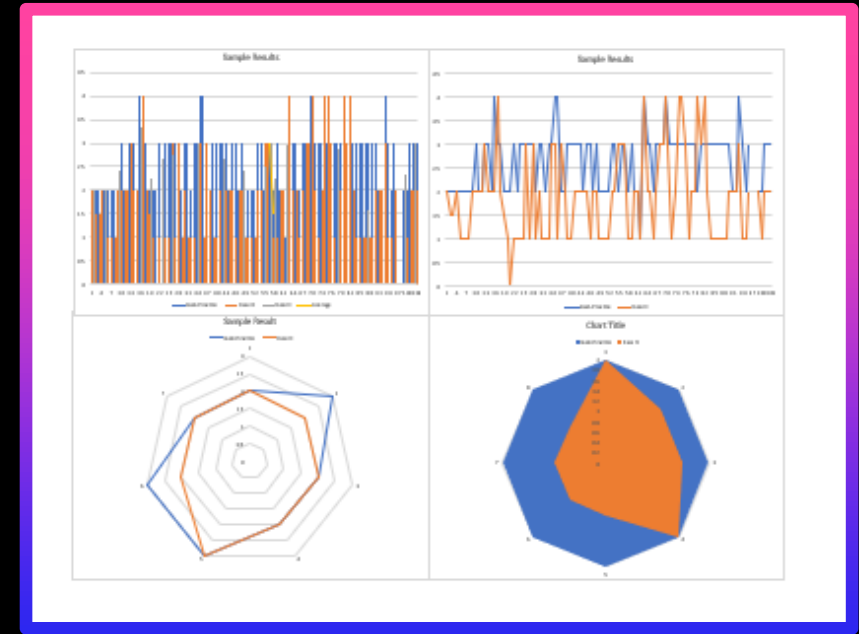

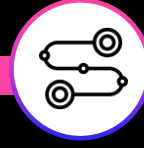

Develop
Maturity Model

Recommend
Target State

Kickstart your DevOps
Journey: Nasstar DevOps
Jumpstart

" Identifying every specific pain point that needs improvement and adjusting the existing process, followed by a plan to do things differently to take the company into the future."

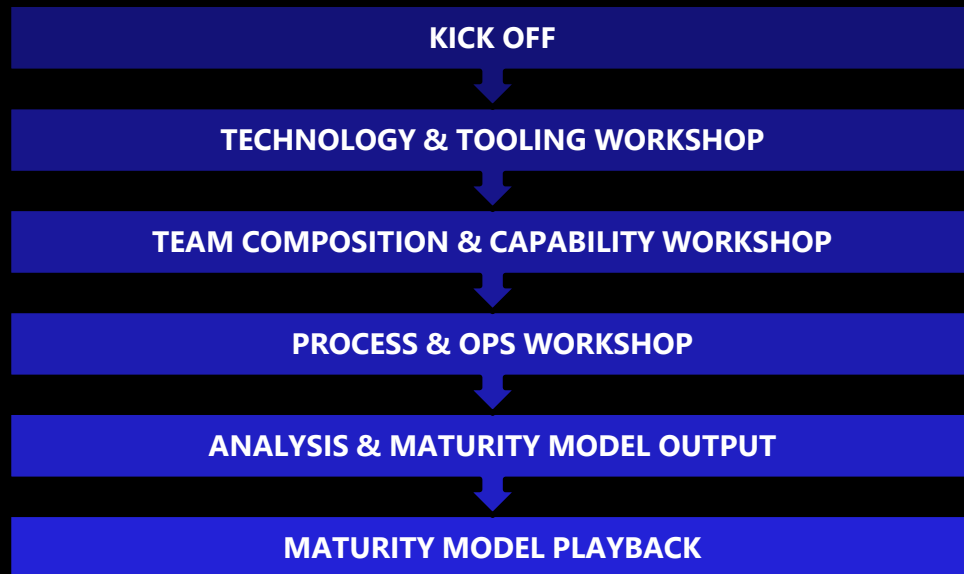

Gartner, 2019

ENGAGEMENT SCHEDULE

The NASSTAR DevOps Maturity Assessment engagement consists of a variety of engagement approaches, complimented with cutting edge technology.

The outputs are thoroughly analysed by our expert DevOps SMEs, and findings are consolidated into a WAF aligned health check report with respective actionable recommendations, which can be implemented by our certified multidisciplinary team, or yours.
