

ESG And Net Zero Tech Innovation Services

Helping Organizations In Their Net Zero Transition

The United Nations has called for global efforts to achieve net zero emissions by 2050 to mitigate the effects of global warming. However, fulfilling net zero commitments involves more than simply setting targets for carbon emissions, renewable energy, and carbon accounting. Manually crunching data to fulfill ESG reporting requirements is a complex, labor-intensive activity. Organizations encounter numerous challenges, including navigating complex supply chains, fostering behavioral and cultural change, and establishing reliable measurement and reporting systems.

Accelerate Your Net Zero Journey With Hexaware's Services

Easily capture,
calculate, and
measure ESG data in
real-time

Connect all crucial
business areas for a
comprehensive net
zero transition

Govern sustainability
goals and manage
business risks
transparently

Hexaware's comprehensive ESG service can drive your organization's successful transition to a net-zero future. Our offering combines cutting-edge technologies with industry-leading expertise to help you define, implement, and monitor sustainable practices – reducing your carbon footprint while enhancing operational efficiency. With Hexaware, you can confidently navigate the complexities of environmental stewardship.

We integrate the best-of-breed products across internet of things (IoT), enterprise systems, carbon accounting, and reporting software. Our solutions are technology- and product-agnostic, allowing easy integration into existing products within your IT ecosystem. Hexaware's partner ecosystem with leading products in carbon accounting and ESG reporting, as well as cloud solutions like Azure and AWS, ensure that you realize the full value of your technology investments.

<p>Current State Assessment and Baseline </p> <p>We help you aggregate and measure your organization's carbon footprint and assess your current energy usage, water consumption, waste management, and carbon pricing aligned to your ESG goals and policies. This establishes a baseline for ESG risk identification, compliance, and performance tracking.</p>	<p>Data Integration Accelerator </p> <p>We offer a framework for accurately capturing your organization's carbon footprint data through various sources such as IoT, sensors, enterprise systems, and Excel-based templates. We ensure the integration of this data into carbon accounting and reporting software for informed decision-making.</p>	<p>Frameworks Based on Global Regulations </p> <p>We integrate global frameworks, such as Task Force on Climate-related Financial Disclosures (TCFD), CDP, Sustainability Accounting Standards Board (SASB), US Securities and Exchange Commission (SEC) climate disclosures, and Science Based Targets initiative (SBTi) into your organization's systems. Our pre-built data models help interpret the collected carbon footprint data effectively.</p>
<p>ESG and Net Zero Pathways </p> <p>We assist you in setting targets and goals aligned with regulatory and market requirements. We can help your organization establish enterprise-level ESG goals and policies related to decarbonization, renewable energy usage, material usage framework, industry-specific KPIs, and benchmarks.</p>	<p>Scope 3 Emissions and Supply Chain/Vendor Management </p> <p>We enable you to capture data from upstream and downstream suppliers, calculating Scope 3 emissions. Our enablers can facilitate supply chain automation and cost optimization targeted at reducing Scope 3 emissions. You can track data assumptions, categorize and account for offsetting by vendors, and ensure granular data for audit purposes.</p>	<p>Climate Resilience and Reporting </p> <p>We help you determine climate risk and its financial impact on your business. We offer capabilities to embed climate risk strategies in your organization's revenue and service streams. You can disclose and report climate risks based on the Task Force on Climate-related Financial Disclosures (TCFD), Sustainability Accounting Standards Board (SASB), and US Securities and Exchange Commission (SEC) Climate Reporting norms.</p>
<p>Transition Views and Analytics </p> <p>With AI and data-driven solutions, we enable organizations to manage transition risks, scenario analysis, low-carbon solutions, and insights related to energy transition, water and waste management, allowing you to make informed decisions.</p>	<p>Sustainability by Design </p> <p>Our capabilities enable us to embed sustainability by design principles into your organization's various processes, including green software, green infrastructure, and green cloud solutions. This ensures the reduction of carbon emissions and improved energy efficiency throughout your organization.</p>	<p>ESG/Net Zero Governance Center </p> <p>We can build a centralized hub for dashboards, analytics, reports, risks, compliance, progress, and remediation. You can access real-time views on emissions, consumption, and net zero transition pathways, thereby enabling your company to gain remedial insights, detect anomalies, and perform scenario-based testing on targets.</p>

Start Your Net Zero Journey Today!
