VIDEO-ENABLE EVERYTHING AND EVERYONE

Whether its e-learning, sales enablement, customer support or executive communication, faster knowledge sharing and collaboration via video in the intranet keeps everyone engaged and on the same page. With a large range of out of the box integrations for all major corporate applications, plus a powerful REST API, you can video-enable virtually all your current and future applications.

WHAT TO EXPECT FROM YOUR EVP

Conventional Online Video Platforms (OVP) mainly focus on video streaming to the internet. A secure Enterprise Video Platform (EVP) is built to meet enterprise needs for internet and intranet use cases with easy integration capabilities in existing IT landscapes, centralized video asset management and the highest security and data protection standards.

Already integrated with 50+ leading systems and applications for all enterprise use cases:

Used in **150+** Countries Worldwide

3M+ Video Files Hosted

200K+ Global Servers

ISO 27001 — Information Security Management — Certified
DIN ISO/IEC 27001:2015

GDPR — European General Data Protection Regulation
