# Azure Landing Zone Quickstart

For Nonprofit

**Launch your cloud journey with an Azure blueprint optimised for impact.**

As a nonprofit ready to embrace the cloud, begin your journey with a solid foundation designed around best practices. Our Azure Landing Zone sets the stage for a scalable and adaptive Azure deployment, accommodating your evolving mission-driven needs over time.

## What will we do?

Crafted with nonprofits in mind, our Azure Landing Zone offers a secure, scalable, and diverse Azure environment, drawing from both SoftwareOne and Microsoft's best practices. It's the ideal launchpad for your mission-driven development and experiments.

The essence of this Landing Zone is to give nonprofits a smooth start in Azure, constructed firmly on Microsoft's architecture standards. Our expert consultants will work closely with your key team members to shape a landing zone that aligns with your organisation's unique impact goals. As we conclude, we'll review the design choices made and hand the reins back to you, ensuring you're poised for continued success.

### Making a difference with Azure

Nearly three-quarters (74%) of nonprofits say digital transformation is **essential**.
