

Slik Data Protection

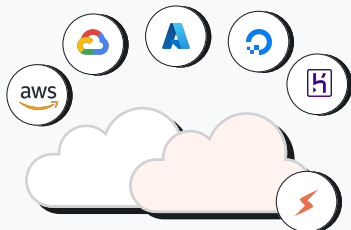

Slik protects your mission critical databases from disasters. It works as an easy to use SaaS application that connects with your database to provide a robust backup and restore solution. Along with backup and restore, Slik delivers a globally redundant, private, and secure solution that automatically scales as per the needs of your business.

Slik is a multi-cloud solution that provides data backups, restorations, disaster recovery, and ransomware protection at enterprise scale.

How Slik Works?

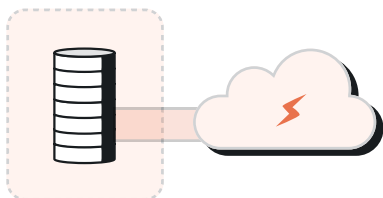

Why Slik?

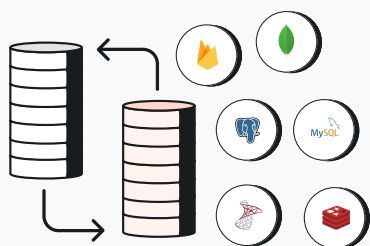

Multi Cloud Support

Slik works with all the major cloud providers including AWS, Google Cloud, Azure, Digital Ocean, or your custom self hosted cloud solution.

VPC Support

Many enterprise databases sit within a VPC network that prevent unauthorized access. Slik supports those configurations by providing a dedicated data line between your database and Slik's cloud.

Supported Databases

Slik Protect provides disaster recovery as a service and supports some of the most popular databases including PostgreSQL, MySQL, MongoDB, SQLServer, Firestore, Redis and more.

Easy to get started

You can get started with using Slik Protect without needing to set up an onboarding call. Just go to slikprotect.com and click on Get Started.

Key Features

Backup and Recovery

- Regular backups
- Support for all timezones
- Instant 1-click data recovery
- Cross-region backups and recovery
- Automated Disaster Recovery plan testing
- Support for multiple RPO and RTO requirements
- Scale on-demand

Cyber Resilience

- Data encryption in-flight and at rest (AES-256)
- Data modification prevention
- Ransomware protection
- Customer-only access to customer data
- No key management required
- Global encrypted data redundancy

Onboarding and Management

- Transparent pricing, pay per bytes stored
- Easy to connect and configure
- MFA authentication (coming soon)
- 24/7 technical support
- Requires no additional team support

Administration

- Zero administrative overhead – no software installation or upgrade required
- Roles based access for backups and recovery
- A central dashboard to manage backups from all databases

Cost optimizations

- On-demand infrastructure and storage scaling reduces TCO
- Eliminate the need for dedicated IT resources to manage data backups

Performance and scalability

- Scales as per the need of the database
- Ability to choose time of day for backups, based on system load
- Optimized to ensure your application is not disrupted during data backups

Use Cases

Multi Cloud Data Backups

Slik connects with your database wherever it is. We work with all cloud providers including AWS, Azure, Google Cloud, Digital Ocean and more.

Ransomware Protection

Slik uses cutting edge innovative technology for immutable storage to protect your data against ransomware attacks.

1-Click Quick Recovery

You can recover your entire backup at any point with just a single click and recovery from accidental deletions, data loss, or ransomware attacks.

Low RTO

Slik Protect has been optimized to provide a low RTO to get you back up and running as quickly as possible in case of a disaster.

Configurable RPO

You can backup your database as frequently as every 6 hours to reduce your RPO.
