

# ML6 Implementation Services

## General introduction to ML6

November 2023

**ML6**

# Our broad experience and expertise allows us to uniquely tailor our services to client needs

## EXCEPTIONAL TALENT & SKILLS

100+ machine learning & AI experts

70+ certifications in GCP, Azure and AWS

Deep **functional** and **domain** expertise

Security and **Ethical** AI experts

## STATE-OF-THE-ART TECH KNOWLEDGE & ASSETS

17% of our workforce is fully dedicated to **ML research**.

Modular, best-in-class **boilerplates** that accelerate impact & secure development

View on the **latest tech stack and tools** available on the market

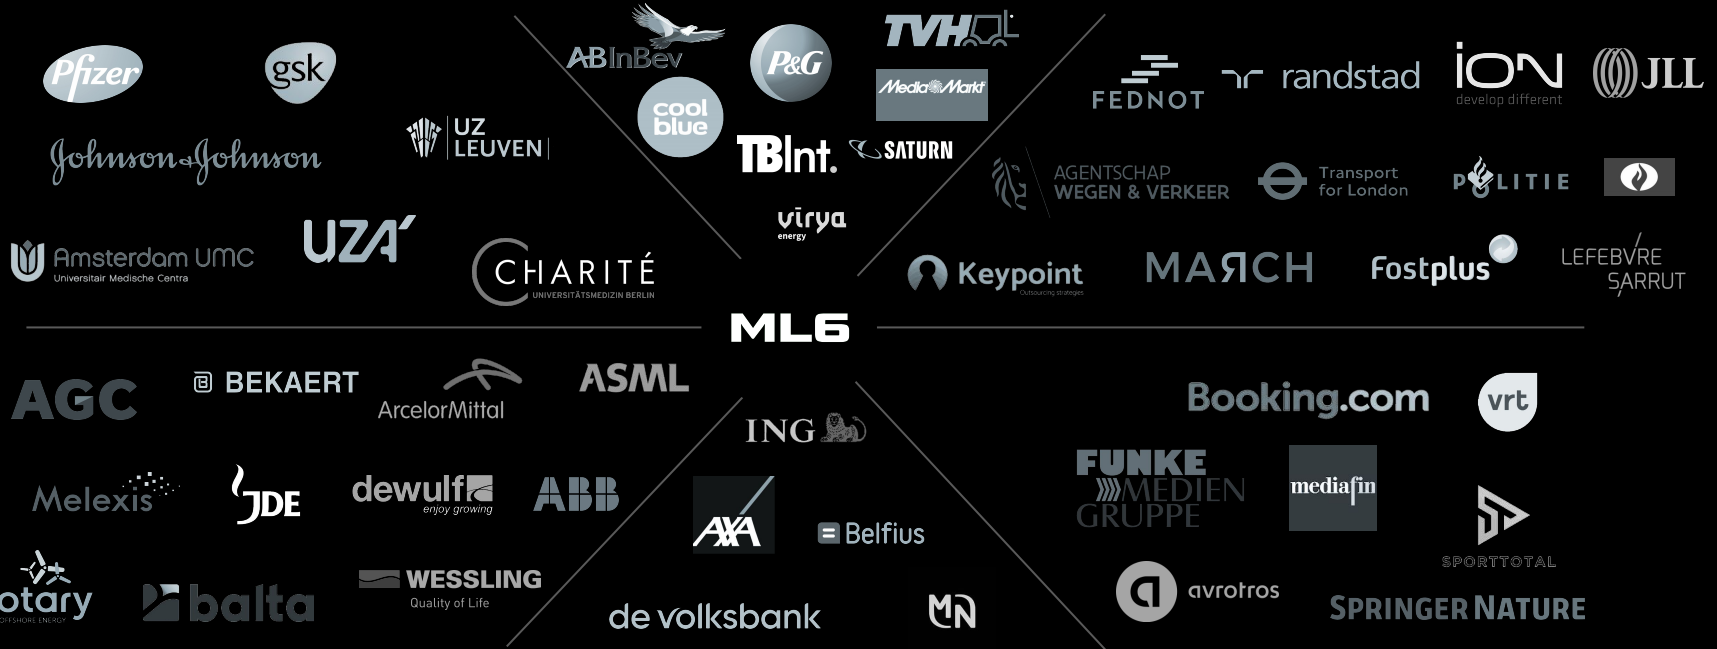

**Deploy anywhere:** (edge, multi-cloud, on-prem) to match the client's unique needs and preferences

# We serve clients across industries

Life Sciences & Healthcare

CPG, Retail & Ecommerce

Public & Professional Services

Manufacturing & utilities

Financial Services

Communication, Media & Technology

# ML6 - your partner for AI

## We accompany organisations through the entire AI journey

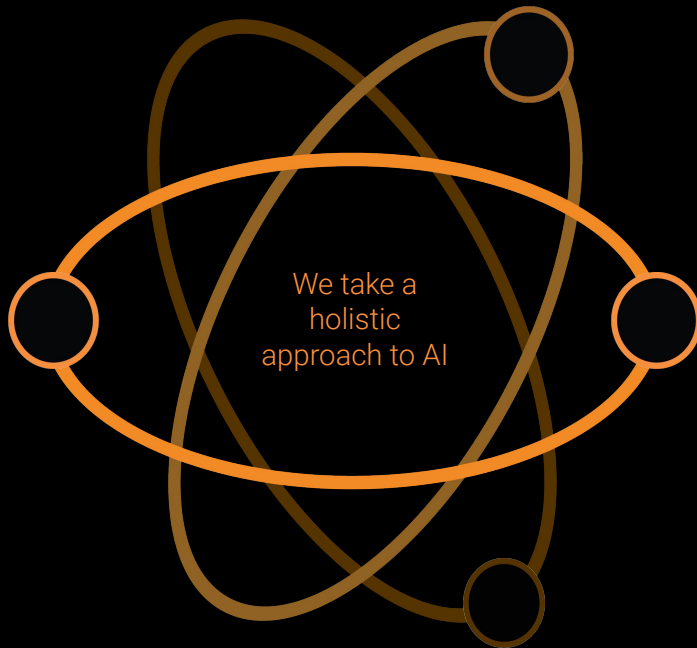

- Use case ideation & assessment
- Designing, building and deploying solutions
- Managed services for support and maintenance
- Further scaling and evolving solutions

## We help remove all barriers to technology adoption

- Security
- Ethics & Regulation
- Business case building
- Selecting the right tech stack
- Facilitating user adoption

## We cover all AI domains

- Machine Vision
- NLP
- Structured Data
- Reinforcement Learning & Generative AI
- MLOps & Engineering best practices

## We build bespoke ML solutions

- Solution tailored to complex client needs
- Agile development, accelerated through the use of boiler plates
- Reliable, robust & easily maintainable solutions

## We deliver end-to-end solutions

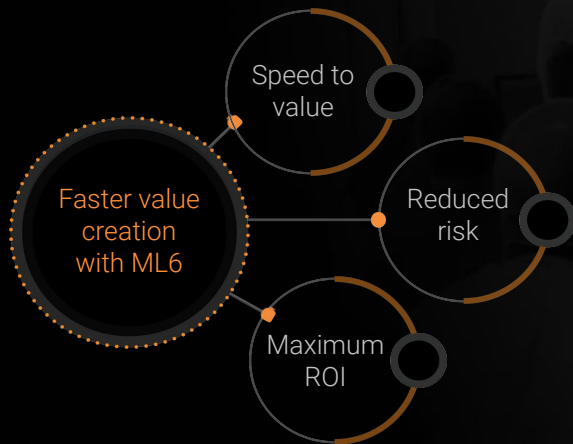

- Data labelling
- Sourcing of internal and external data
- Selecting the right hardware (incl. cameras, sensors, edge devices)
- Front-end development
- Integration, with traditional machines and robots

## We are open source minded

- Tech radar for stack selection
- Hybrid cloud - on premise; and edge deployment

# We enable organisations to create business value with AI

We help companies implement Artificial Intelligence in a **strategic, efficient and rapid** way.

# We help our clients build their own AI capabilities, resulting in near and long term value creation

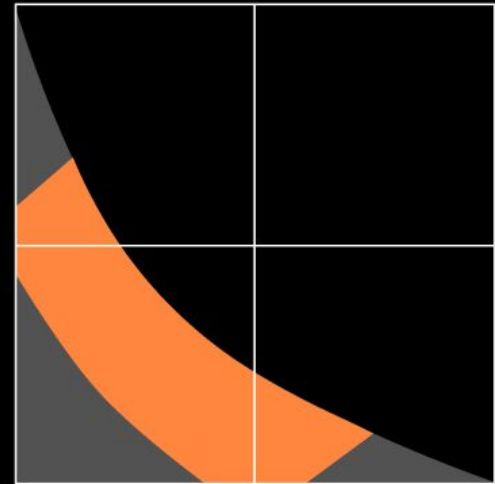

## BUILDING BESPOKE AI SOLUTIONS

We build custom and impactful AI solutions that can be used as lighthouse use cases to create additional endorsement for AI.

## BUILDING AI CAPABILITIES

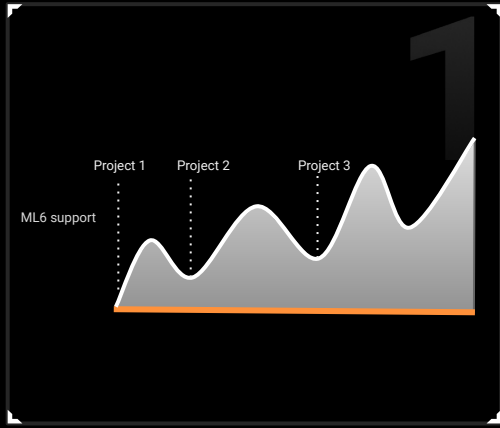

We think long term and help our clients build their own AI capabilities. After all, an organisation's level of maturity determines the business value it can unlock from solutions.

# We innovate together with clients.

Our collaborative approach is tailored to client needs

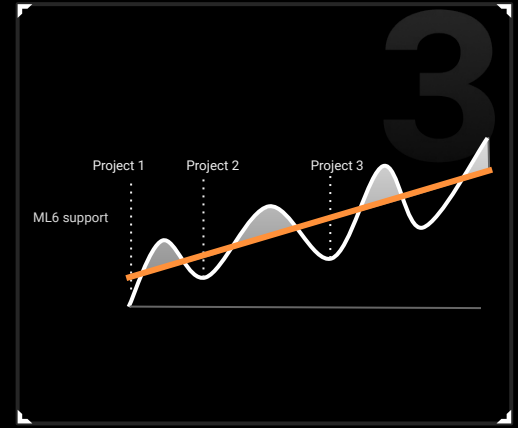

**We deliver & support  
your AI solution for you**

*We drive the creation, and potentially also the run & maintenance of your AI solution for you, while actively and continuously involving your experts for input, testing and validation*

**We co-create  
your AI solution together**

*We work in joint project teams, leveraging our deep AI skills to drive delivery while actively involving your people, and hence helping to build your AI skills*

**We 'augment',  
coach & bring expertise**

*We put you in the driving seat of building your own AI solution while providing you with expert advice and coaching to ensure progress and quality*

# What our clients say

“ML6 helped us to build and deploy an intelligent matching engine that has the potential to have a big impact on our candidate and customer journeys. **Hence influencing our top and bottom line.**”

*Randstad, Günther Ghijssels (CIO)*

“I was positively surprised by the **interpretation** of our questions. Because often, that is where things go wrong. Someone asking something from a commercial/strategic point of view, translating that in a concrete project. That is surely the biggest strength of ML6. ”

*March Real Estate, Philippe Meire (Founder & CEO)*

# What our clients say

**“Working with ML6, we achieved four years worth of R&D in just two weeks.”**

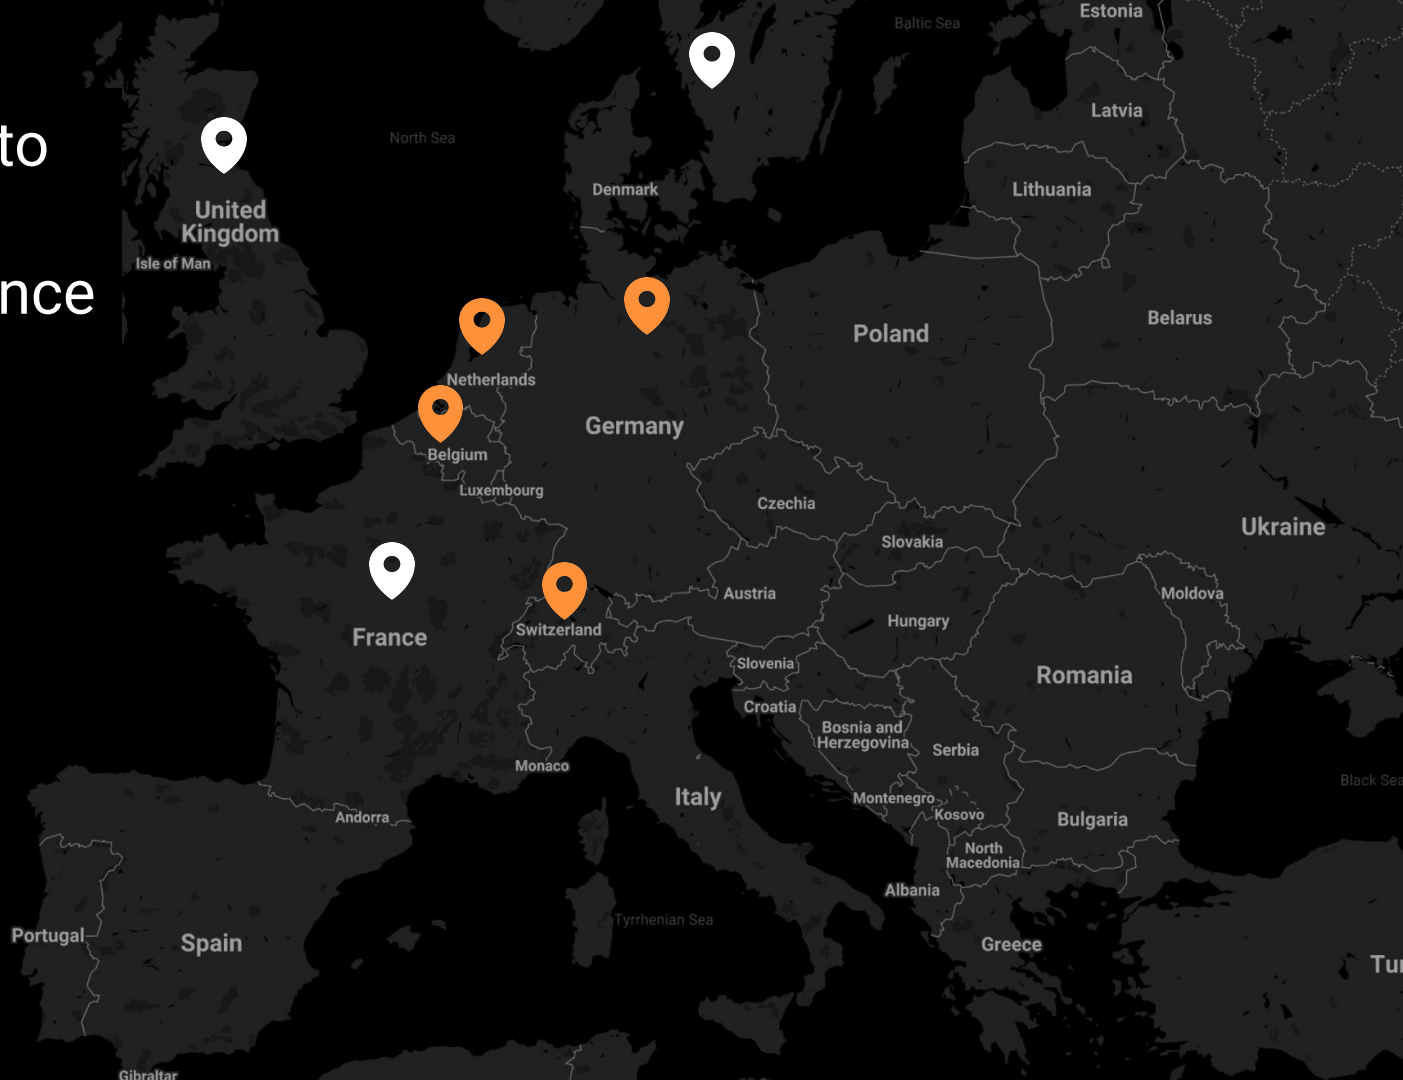

Bekaert, Peter de Jaeger  
Senior Digital Expert

**Working with ML6 is investing in our own people.** Through our collaboration we received a knowledge transfer in a very efficient way to bring our people to a higher level.”

CNH Industrial, Thomas Mahieu  
Combine Automation Lead Engineer

Our ambition is to become the European reference in AI

# ML6 Values

## Excellence in delivery

we strive for excellence in everything we do

## Bring out the best in others

we strive to develop exceptional people and value people who inspire and empower others.

## Do good

we do good for our clients, society and our peers

## Passion for technology

we're tech savvy, autodidact, hungry for information and love to experiment with new technology- lightning-fast!

## Doing rather than talking

we are curious and creative and have a bias to action. We focus on solutions, not problems.

## Take ownership

we "get shit done" by taking matters into our own hands and see them through until the end. We are empowered to set up cross-unit initiatives.
