

Discover the  
Opportunity to  
modernize your  
datacenter.

by Finchloom

## Azure Migrate Assessment

Legacy systems, scalability concerns, maintenance and security risks — all problems faced by companies with on-premise servers. Finchloom's Azure Migration Assessment empowers your businesses with a clear, tailored roadmap to seamlessly transition to Microsoft Azure, enhancing your infrastructure's scalability, security, and efficiency.

### Considering Transformation to Azure?

- Azure simplifies Windows Server Deployment
- Built-in DR
- Simplified Management (backup, patching, monitoring)
- Extended Security Updates for older OS
- Cost Management capabilities to easily budget and predict Azure spend

### What you Get with Finchloom's Packaged Solution

- Estimated costs to run your environment in Azure
- Recommendations on correct sizing VMs in Azure
- Opportunities to get rid of servers
- Opportunities to reduce cost of Infrastructure management

SERVICES

## INNOVATION THRU COLLABORATION

MODERNIZE &  
CUSTOMIZE WITH  
**FINCHLOOM**

### Azure Migrate Assessment

FLIGHT delivers consistent expert engineering on complex Microsoft projects, on-time, and on budget. The Azure Migrate Assessment is your first step toward a cloud infrastructure that is more accessible, manageable, scalable, and secure.

- 🐦 Fixed Scope of Work
- 🐦 Runs about 2 weeks
- 🐦 One Flat Rate \$3550\*
- 🐦 Able to start immediately

\* Promotions available

### Azure Migrate On-Premises Assessment

The project leverages the Azure Migrate tool to provide the current state of your environment, such as the number and type of servers, applications, databases, and workloads that need to be migrated, and the estimated cost and performance requirements.

Finchloom will also base its recommendations on your company's project objectives, such as modernizing on-premises workloads, moving resources away from a current datacenter, reducing operational costs, and improving business outcomes.

### At the End of Your Azure Migrate Assessment

You will receive:

- An overview of the customer's IT environment.
- Assessment Report(s) based on workload requirements.
- A roadmap for cloud migration.
- A migration estimate of the time, cost, and resources required.
- Recommendations and Next Steps.

### Engagement Approach

After review of your company objectives, environment, priorities, and complexities, Finchloom will provision an Azure environment, deploy the Azure Migrate tool, run the assessment, and present its findings along with recommendations for the most effective cloud environment to suit your company's needs.
