

Cloud health check

Technical Advisory Services

As a trusted partner, we will help accelerate your journey towards operational excellence in the cloud.

The challenge

In our ever-evolving world, organisations need to be able to adapt. As an essential enabler of agile operating models, cloud has therefore become the "new normal" for how we work.

But with constant developments to cloud services comes the increasing complexity of managing them; a key challenge being the need to ensure that all elements operate in an efficient and optimal way.

Navigating this requires the right expertise, so that you're confident you have well-architected systems in place.

enterprises do not have a fit-for-purpose cloud strategy.

How we can help

Using our extensive real-world experience, knowledge, and expertise around Azure, we help clients achieve well-architected, maintained, and understood Microsoft Azure cloud environments.

Using our CGI cloud framework, we can assess your Microsoft Azure cloud environment using a focused lens. This provides you with a comprehensive understanding of your existing cloud usage, and recommendations of how to maximise value realisation.

We will also prepare you for a positive change experience. Even for complex projects with lots of moving parts, our health check will empower you with the confidence to make an impactful transition from old, to new cloud-enabled ways of working that support your organisation's success.

Our approach

We start by identifying your current cloud usage. This includes meeting with key stakeholders to understand all aspects of your cloud footprint, along with any challenges you face, and the business drivers that need to be incorporated.

We then review the data collated alongside all stakeholder input, and assess against the CGI cloud adoption framework to ensure we reduce risks and maximise the value of your cloud transformation.

We will provide a comprehensive report with the findings of your health check. This includes key recommendations to ensure maximum value can be achieved from your public cloud environment.

We also outline the next steps for maximum success in your future cloud journey.

No matter where you are on your cloud journey, our Technical Advisory experts are here to help you manage and optimise your cloud environment.

The benefits

Our aim is to make sure that your Microsoft cloud journey empowers your organisation to thrive. We'll help you tailor best practices from Microsoft to enable the best results.

Our health check will empower you with:

Improved insights – A comprehensive understanding of your current cloud footprint and how it is consumed.

FinOps – Ensuring you have the requisite knowledge to be in complete control of your cloud costs, including how to use cloud services optimally with inherent security and governance guardrails.

Quality assurance – The capability to align your cloud usage with the principles of a well-architected framework for cloud.

Experience – With +45 years of experience, we'll provide you with the expertise to instill confidence in your cloud vision, ensuring that it aligns with your business goals.

Sustainability - We use our industry knowledge and <u>sustainability</u> and <u>climate change expertise</u> to help you identify and take advantage of opportunities to lower your carbon footprint.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world.

We are insights-driven and outcomes-based to help accelerate returns on your investments. Across 21 industry sectors in 400 locations worldwide, our 91,000 professionals provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
