

Azure Stack HCI and Hardware Integrate on-premises operations with Azure capabilities.

Includes hardware infrastructure, migration, management, security and support.

About Global Micro

We are a technology solutions provider with over 30 years of experience in delivering IT solutions. We understand the pace of technological innovation and strive to lead, allowing you to focus on what you do best – your business. Our approach sets us apart from the competition, and our primary customers are businesses looking for comprehensive IT solutions.

Unify Resource Management with Azure Stack HCI and Hardware as a Service

In the rapidly evolving business world, combining cutting-edge cloud-connected architecture with the best hardware is important. Azure Stack HCI, enhanced with our unique Hardware as a Service (HaaS), brings this combination to life. Global Micro's service stands out by providing onsite, configured premium hardware, all at competitive rates, to simplify your acquisition process. Through our managed infrastructure, we offer a rent-to-own model, making high-end technology accessible to all business sizes, while our migration support ensures a seamless transition to upgraded software and hardware, facilitating a smooth go-live process.

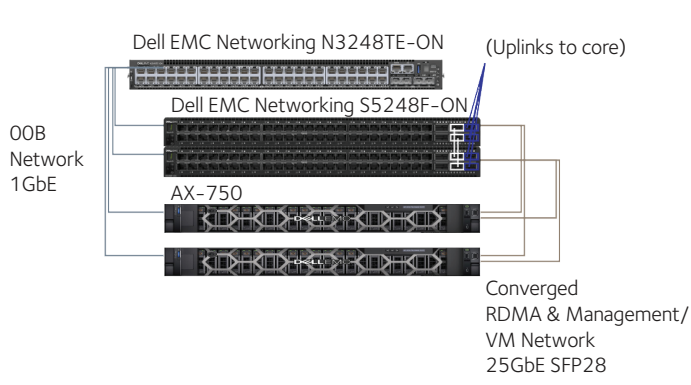

- Storage solution for large files like media or CAD drawings.
- Simple to integrate into an existing IT environment.
- Onsite storage is replicated to the cloud.
- Premium infrastructure - Dell Azure Stack HCI compliant.
- Scalable server configuration and robust NVMe drives.
- Securely manage onsite infrastructure from anywhere.
- Excellent warranties on infrastructure.
- 4-hour response time for critical support is provided under our SLA.
- Let us migrate your workloads to the new infrastructure.

Ideal for Onsite Workloads

For businesses that need to run workloads onsite because of factors such as latency, data sovereignty, or high IO demands, Azure Stack HCI with HaaS is an ideal solution. It's specifically designed for clients who prefer to keep their operations on-premises, ensuring cost efficiency, enhanced performance, and simplified operations.

Global Micro's Azure Stack HCI and Premium Hardware as a Service

Azure Stack HCI blends on-premises operations with Azure's expansive capabilities, including hardware, setup, configuration, management, and maintenance, all delivered as a service. This integration allows remote co-management of your solution, backed by Microsoft's top-tier hyper-converged infrastructure stack, offering a secure platform for both Windows and Linux guests.

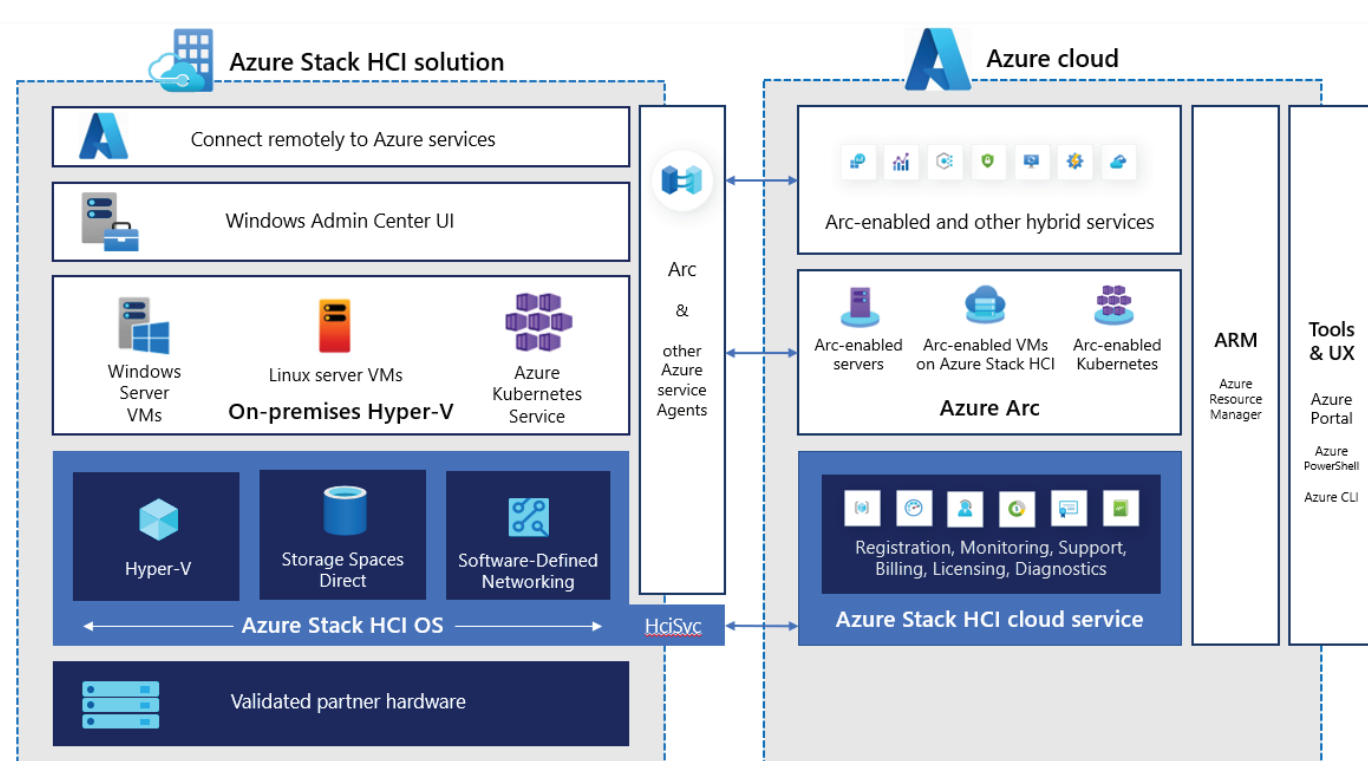

Assessment and Upgrading of Services for Legacy Infrastructure

We understand the challenges of migrating from legacy infrastructure. Where your business operates with outdated operating systems, virtualisation technologies, or SQL versions, our team is ready to assist. We offer comprehensive assessments and scoping services to help you seamlessly upgrade and leverage the capabilities of newer versions. Our services extend to aiding in the migration of your workloads to the new infrastructure, ensuring a smooth transition and minimal disruption to your operations.

Flexible, Scalable, and All-Workload Ready

Azure Stack HCI's architecture is designed to easily connect to Azure services such as backup, monitoring, and security, while also integrating smoothly into your existing IT environment. Its robust design makes it versatile for any workload, and it offers disaster recovery options via a stretch cluster. Experience superior performance for SQL Server databases and virtual desktop infrastructure, with the added benefits of low latency and data sovereignty.

Get this Tailored Solution for Your Business

Ready to modernise your data centre with Azure Stack HCI and HaaS? Contact us for a personalised consultation on a reference architecture to meet your specific needs. We'll conduct a detailed assessment and tailor a solution by drawing on our extensive experience with similar environments. Let us guide you in transitioning to a more efficient, secure, and scalable infrastructure.

Reach out today to discover how Azure Stack HCI with HaaS can revolutionise your business operations.

Secure. Comply. Succeed.

With more than 30 years of experience and over 50,000 successful cloud migrations, Global Micro specialises in creating sustainable and holistic ICT solutions tailored to your business. Global Micro is a Microsoft Cloud Service Provider with 9 gold competencies and has to date delivered secure, robust solutions to over 4,500 companies.
