## Microsoft CSI Data Security Check

Identify data security risks in organizational data with this Microsoft-developed engagement that leverages Microsoft Purview tools in an automated process.

### Overview

Understand the risks of *Dark Organizational Data*

Receive an analysis and report on findings and associated risks

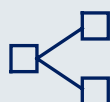

Learn about the risks organizational insiders may impose

Learn about tools and services that can help mitigate risks

Assess your environment against key data protection standards

Explore recommendations and next steps

## Intelligently investigate and take action on data security risks

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach that can help quickly identify, triage, and act on data security risks is more important than ever. By the end of this engagement, Lighthouse experts in Microsoft compliance will provide you with:

- A Security Check report that includes findings and insights from the automated discovery process.
- List of recommendations and actionable next steps that will help mitigate the identified risks.
- Clear look into Microsoft's approach to data security and mitigating and controlling insider risks.
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps.

## Why Lighthouse?

For more than 25 years, Lighthouse has been providing global security and compliance advisory solutions combining decades of industry experience and best practices with leading edge technology driven approaches to help organizations confidently achieve scalable, practical success.

Our unique expertise in security, compliance, and legal together with deep expertise in the Microsoft M365 and Purview technologies results in a full breadth of Microsoft security and compliance offerings and a track record of collaboratively supporting Security, Compliance, IT, and Legal business decision makers for measurable results.
