

SUSTAINABILITY AND CLIMATE CHANGE ADVISORY

ESG Solution Excellence

CGI

Microsoft Sustainability Manager

CGI excels in the deployment of Microsoft Sustainability Manager (MSM), guiding organisations towards the achievement of their sustainability objectives. We possess a high level of expertise in harnessing digital technology to deliver sustainable solutions, supported by comprehensive and client-verified success stories in decarbonization and ESG-related reporting, including GRI, TCFD, and CSRD.

We seamlessly integrate technology into a sustainable service management package, allowing us to measure our clients' impacts, optimise their supply chains, and orchestrate and optimise data architecture in expanding sustainability-linked ecosystems. Our approach involves evaluating baseline ESG and carbon data, automating action plans, and successfully integrating MSM into the business.

Our proficiency in sustainability, business, and IT consulting streamlines the transformation journey for all, ensuring a comprehensive and holistic transformation process.

CGI ESG Solution Excellence

CGI's unparalleled proficiency offers a gold standard in Microsoft Sustainability Manager (MSM). Our approach empowers organisations to realise their ESG aspirations, embracing best-practice methodologies to ensure comprehensive, traceable, and consistently accurate reporting.

Challenges

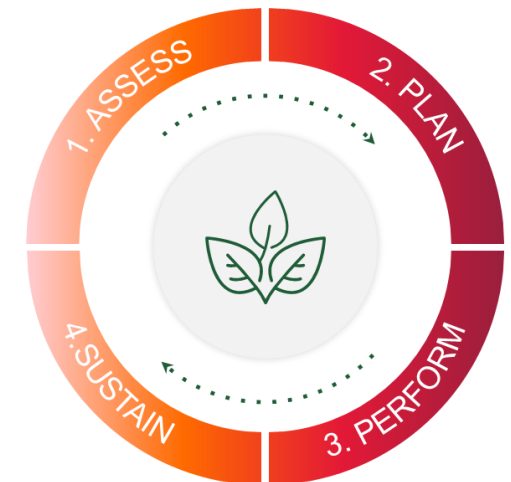

- Integrating sustainability technologies and systems together.
- Using varied data to measure environmental impact.
- Streamlining complex supply chains for speed.
- Managing rapidly increasing data-sets.
- Finding profitable ways to reduce carbon emissions and promote sustainability.
- Adapting to new tools' learning curve.
- Easily and rapidly expanding sustainably reports across the world.
- Embracing organisational change to a more sustainable way of working.

CGI solution

- Assess – Baseline ESG and Carbon Scope 1, 2 & 3 data across your value chain, closing data gaps and connecting the data cohesively.
- Plan – Prepare the automated plans, visuals, training, templates and tools for the organisation to ensure successful roll-out.
- Perform – Pilot and Proof of Concept – Deliver a tactical deployment of MSM to a minimum viable product.
- Sustain - Finalise the first deployment with a plan to scale.
- Deploy, transition, support - Deploy and expand across the organisation with service and support packages.

Business benefits

- Proven carbon optimisation and energy-efficiency led by experts, saving costs, enhancing operations and experienced in reports such as CSRD, TCFD, GRI Etc.
- Make sustainable decisions to achieve climate ambitions.
- A solution meeting all sustainability needs, adaptable and agile.
- Utilise CGI's AI, Azure, and insights for maximum sustainability returns.
- Gain agility with quicker implementation and deployment.
- Well-architected solutions for a low-carbon economy.
- Proficient sustainability, business, and IT consulting available.

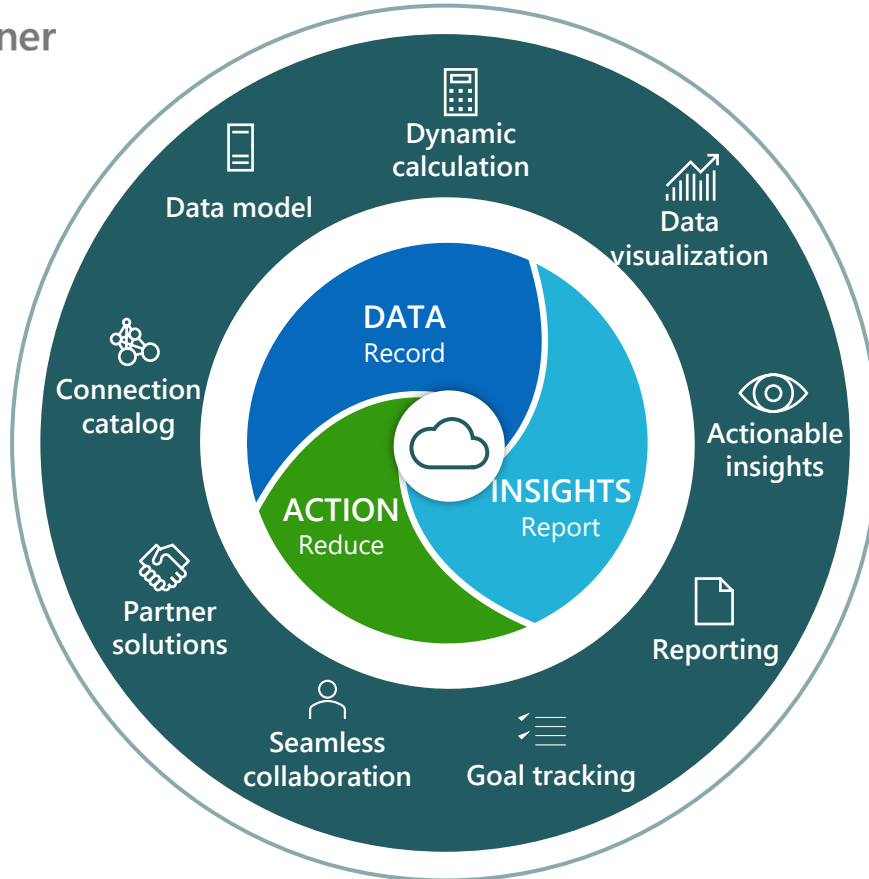

How we deliver solutions in partnership with Microsoft

Microsoft Sustainability Manager

Microsoft Sustainability Manager automates and accelerates sustainability management, facilitating data ingestion, emissions calculation, and goal-setting for organizations to reduce their emissions footprint and transform their business.
