CLOUD READY ENVIRONMENT

Comprehensive methodology for implementing and governance a cloud

## Helps you to create a solid fundamentals for your Cloud environment

Correct implementation of the cloud requires prior preparation of procedures and internal regulations to meet the company's requirements in terms of service security. The implementation should be preceded by defining a list of principles related to cloud services. Microsoft's recommendation is that the implementation should be based on good Microsoft practices and the principles defined in the CAF (Cloud Adoption Framework).

We will focus on:

- defining the basic principles related to cloud computing

- preparation of the general configuration (High Level Design) of the environment with multiple subscriptions

- preparing Management Groups that will allow you to allocate and manage resources according to your business requirements and procedures

- developing a list of recommendations for policies limiting the actions of administrators and forcing specific configurations

- developing a naming-convention list and tagging recommendations

- preparing landing-zones for your applications

- design and implementation of network solutions

Why our clients decide on our help

- ➢ They deploy the cloud in an orderly and predictable manner

- ➢ They are sure that the implementation complies with their security requirements

- ➢ Cloud management is performed in the manner recommended by the solution provider

- ➢ They can entrust the implementation of services to partners without fear of losing control of the environment

Offer – One-stop shop

All services you need provided by one company

Service Desk
Digital
Business Services
Software development & maintenance
Data & Analytics
Cloud & IT infrastructure
Artificial Intelligence
Testing & quality assurance
Cybersecurity

Enterprise software: Adobe, Atlassian, Google Workspace, Microsoft 365, Salesforce, SAP, ServiceNow
Engineering
Trainings

Tangible Benefits / Desired Outcomes

✓ You take care of your business development - we take care of the cloud
✓ Our architects will support you in the latest technologies
✓ We are ready to maintain your infrastructure with dedicated support team

Microsoft Solutions Partner

Microsoft Cloud

Why Sii

600 certifed experts

Solution Architects, Network Engineers, Security Engineers, DevOps Architects, Data Engineers, Azure Administrators, Azure Developer, Cybersecurity Artchitects, D365 Consultants, Power BI Analysts

Leading cloud services

Microsoft Azure, Microsoft 365, Dynamics 365, Power Platform

Innovative industry solutions

For manufacturing banking, healthcare, real estate and public sectors

End-to-end Project Support

Mrom preliminary data analysis, target model creation, implementation on dedicated devices to maintenance
